

EIDOLON HOLSTERS BASIC KIT FOR GLOCK® - RAVEN CONCEALMENT SYSTEMS G17 EIDOLON BASIC HOLSTER DOUBLE AMBIDEXTROUS SHORT BLACK

[Home](#)

The Eidolon Basic Kit from Raven Concealment Systems is the culmination of over three years of design and development. Eidolon is designed to be the most refined and functional Inside the Waistband holster on the market. At the core of the Eidolon system is the holster shell. The shell is precisely fitted to the weapon on the inside and is designed to be smooth on the outside and work with the body, belt and clothing in any carry position to maximize comfort and concealment. At the same time the shell provides attachment points for a host of accessories to allow the user to tailor the system for their specific carry needs. The holster shells feature an innovative adjustable retention feature that isolates the tension on only the front of the trigger guard. This provides for an extremely clean feel when drawing and holstering with minimal adjustment - unlike other adjustable retention holsters that grossly squeeze the entire trigger guard and/or frame and result in a mushy feel as the pistol drags against the inside of the holster. All holster shells are fully compatible with most extended controls, any brand or size sights, any type of MRDS mounted behind the ejection port and most extended/threaded barrels. The Right and Left Hand body shield options feature a long body shield on the inboard side of the holster and a short body shield on the outboard side of the holster as the holster is being worn. The body shield extends to the rear of the slide to help protect the user from the weapon and the metal of the slide from the user. The long shield is cut and profiled to minimize interference with a full firing grip. The Ambidextrous Short body shield option can be configured for right or left hand shooters. The body shields are cut to clear the hand completely but yet still help prevent clothing from entering the mouth of the holster and provide a visual and tactile guide for re-holstering the weapon. The Ambidextrous Long body shield option can be configured for right or left hand shooters. The body shields extend to the rear of the slide to help protect the user from the weapon and the metal of the slide from the user. The long shield is cut and profiled to minimize interference with a full firing grip. Though unconventional, we've found the dual tall body shields to be very useful in preventing clothing from interfering with re-holstering and acting as a great tactile and visual guide "funnel" for the re-holster process. We have not seen any significant draw or presentation issues versus a traditional tall/short or short/short configuration. The RCS "Basic" Inside-the-Waistband Eidolon kit is anything but basic. This system is excellent for IWB carry between 3 and 5 o'clock for a right handed shooter. The Basic IWB kit is a tuckable, compact IWB system that can be used with one or both belt attachments and give you scores of cant and ride height adjustments. The Basic IWB Kit includes: One holster ambi shell of your specification One pair of 1.5" Overhook belt attachments One Tall Spacer for mounting the belt attachment below the trigger guard All needed hardware and full instruction manual The Glock 19/Universal model has a pass-through open bottom design and will fit any 3rd or 4th Gen. Glock 9mm/.40cal pistol. The holster shell itself is equal in length to a Glock 19 pistol. The Glock 17 model has a closed bottom design equal in length to a Glock 17 pistol, but will fit any Glock 26/27/19/23/17/22 3rd or 4th Gen.

Safety Instruction Guide for the Eidolon Holsters Basic Kit for Glock®

Introduction

Thank you for choosing the Eidolon Holsters Basic Kit from Raven Concealment Systems. This product is designed to provide you with a secure and comfortable way to carry your Glock firearm. To ensure your safety and the proper use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- **Product Safety:** Always use the Eidolon Holster in accordance with the manufacturer's instructions to ensure safe handling of your firearm.
- **Enhanced Recalls:** In case of any product recalls or safety alerts, please refer to the official channels for updates and remedies.
- **Online Shopping:** When purchasing online, ensure that the retailer complies with safety regulations and provides clear product information.
- **Special Consumer Focus:** Keep this product out of reach of children and ensure that it is used only by responsible adults.
- **EU Contact Point:** For any safety inquiries, it is essential to have access to a contact point within the EU.
- **Rapid Alerts:** Stay informed about product safety updates through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Proper Fit:** Ensure that the holster is properly fitted to your specific Glock model to maintain safety and functionality.
- **Retention Feature:** Be aware of the adjustable retention feature. Adjust it according to your comfort level while ensuring it does not compromise safety.
- **Body Shield Usage:** Use the body shields as intended to prevent clothing from interfering with the holstering process.
- **Holstering and Drawing:** Practice holstering and drawing your firearm in a safe environment to become familiar with the holster's operation.
- **Inspect Regularly:** Regularly inspect the holster for wear and tear. Replace any damaged components immediately.
- **Avoid Modifications:** Do not modify the holster or its components as this may compromise safety.

Instructions for Installation and Usage

1. Installation:

- Select the appropriate belt attachment (Overhook) based on your carry preferences.
- Attach the belt attachment to the holster shell using the provided hardware.
- Ensure that the attachment is secure and that the holster is stable when worn.

2. Usage:

- Place the holster inside your waistband at your preferred carry position (typically between 3 and 5 o'clock for righthanded shooters).
- Adjust the cant and ride height according to your comfort.
- Ensure that the firearm is securely seated in the holster before moving.
- When drawing the firearm, maintain a firm grip on the holster to prevent it from moving.
- After use, always reholster the firearm carefully, ensuring that the body shields guide the firearm

back into the holster without obstruction.

Disposal Instructions

- **Disposal of the Holster:** When the holster has reached the end of its life cycle, dispose of it in accordance with local regulations. Ensure that any components that may pose a safety hazard are disposed of properly.
- **Recycling:** If possible, recycle any plastic components according to local recycling guidelines.

Contact Information for Further Support

For any safety inquiries, product support, or further assistance, please refer to the manufacturer's official website or customer service channels. Always ensure that you are using the product in compliance with local laws and regulations regarding firearm carry and usage.

By following these safety instructions, you will maximize your safety and the effective use of the Eidolon Holsters Basic Kit for Glock. Always prioritize safety and responsible firearm handling. Thank you for your attention to these important guidelines.
