

EIDOLON HOLSTERS BASIC KIT FOR GLOCK® - RAVEN CONCEALMENT SYSTEMS G19 EIDOLON BASIC HOLSTER DOUBLE AMBIDEXTROUS TALL BLACK

[Home](#)

The Eidolon Basic Kit from Raven Concealment Systems is the culmination of over three years of design and development. Eidolon is designed to be the most refined and functional Inside the Waistband holster on the market. At the core of the Eidolon system is the holster shell. The shell is precisely fitted to the weapon on the inside and is designed to be smooth on the outside and work with the body, belt and clothing in any carry position to maximize comfort and concealment. At the same time the shell provides attachment points for a host of accessories to allow the user to tailor the system for their specific carry needs. The holster shells feature an innovative adjustable retention feature that isolates the tension on only the front of the trigger guard. This provides for an extremely clean feel when drawing and holstering with minimal adjustment - unlike other adjustable retention holsters that grossly squeeze the entire trigger guard and/or frame and result in a mushy feel as the pistol drags against the inside of the holster. All holster shells are fully compatible with most extended controls, any brand or size sights, any type of MRDS mounted behind the ejection port and most extended/threaded barrels. The Right and Left Hand body shield options feature a long body shield on the inboard side of the holster and a short body shield on the outboard side of the holster as the holster is being worn. The body shield extends to the rear of the slide to help protect the user from the weapon and the metal of the slide from the user. The long shield is cut and profiled to minimize interference with a full firing grip. The Ambidextrous Short body shield option can be configured for right or left hand shooters. The body shields are cut to clear the hand completely but yet still help prevent clothing from entering the mouth of the holster and provide a visual and tactile guide for re-holstering the weapon. The Ambidextrous Long body shield option can be configured for right or left hand shooters. The body shields extend to the rear of the slide to help protect the user from the weapon and the metal of the slide from the user. The long shield is cut and profiled to minimize interference with a full firing grip. Though unconventional, we've found the dual tall body shields to be very useful in preventing clothing from interfering with re-holstering and acting as a great tactile and visual guide "funnel" for the re-holster process. We have not seen any significant draw or presentation issues versus a traditional tall/short or short/short configuration. The RCS "Basic" Inside-the-Waistband Eidolon kit is anything but basic. This system is excellent for IWB carry between 3 and 5 o'clock for a right handed shooter. The Basic IWB kit is a tuckable, compact IWB system that can be used with one or both belt attachments and give you scores of cant and ride height adjustments. The Basic IWB Kit includes: One holster ambi shell of your specification One pair of 1.5" Overhook belt attachments One Tall Spacer for mounting the belt attachment below the trigger guard All needed hardware and full instruction manual The Glock 19/Universal model has a pass-through open bottom design and will fit any 3rd or 4th Gen. Glock 9mm/.40cal pistol. The holster shell itself is equal in length to a Glock 19 pistol. The Glock 17 model has a closed bottom design equal in length to a Glock 17 pistol, but will fit any Glock 26/27/19/23/17/22 3rd or 4th Gen.

Safety Instruction Guide for Eidolon Holsters Basic Kit for Glock® Raven Concealment Systems G19

Introduction

Thank you for choosing the Eidolon Holsters Basic Kit from Raven Concealment Systems. This product is designed for safe and effective use as an Inside the Waistband (IWB) holster for your Glock firearm. Please read this safety instruction guide carefully to ensure safe handling, installation, and usage of your holster.

General Safety Guidelines

- **Product Safety:** Ensure that you follow all safety instructions to prevent accidents and injuries.
- **Enhanced Recalls:** Stay informed about any recalls related to this product by regularly checking the EU's Safety Gate platform.
- **Online Shopping:** If purchased online, ensure that the seller complies with EU safety requirements.
- **Special Consumer Focus:** This product is not intended for use by children. Keep it out of reach of minors.
- **EU Contact Point:** For any safety inquiries, please refer to the manufacturer's contact information.
- **Rapid Alerts:** Be aware of updates on unsafe products through the Safety Gate system.

Specific Safety Precautions for Use

- **Compatibility:** Ensure that the holster is compatible with your specific Glock model. The Eidolon Holsters Basic Kit is designed for Glock 17, 22, and 31 models.
- **Proper Fit:** The holster shell must fit securely around your firearm to prevent accidental discharge or unintentional release.
- **Retention Adjustment:** Before use, adjust the retention feature to ensure that the holster holds the firearm securely without excessive tension.
- **Clothing Interference:** Ensure that clothing does not obstruct the holster or trigger guard when drawing or reholstering your firearm.
- **Body Shield Usage:** Use the body shields as intended to protect yourself from the firearm and to minimize clothing interference.
- **Holstering and Drawing:** Practice drawing and holstering your firearm in a safe environment to become familiar with the holster's operation.

Instructions for Installation and Usage

1. **Unboxing:** Carefully remove the holster and all included components from the packaging.
2. **Inspect Components:** Check all parts for damage or defects before installation.
3. **Install Belt Attachments:**
 - Choose the appropriate belt attachment (Overhook) for your carry preference.
 - Attach the Overhook belt attachments to the holster shell using the provided hardware.
4. **Adjust Ride Height and Cant:**
 - Adjust the ride height and cant according to your comfort and draw preference.
 - Secure all adjustments to ensure stability during use.
5. **Fit the Holster:**
 - Place the holster inside your waistband at your preferred carry position (between 3 and 5 o'clock for righthanded shooters).
 - Ensure that the holster is comfortably positioned and does not impede movement.
6. **Test Retention:**
 - Insert your firearm into the holster and check the retention.

- Adjust the retention feature as needed to ensure a secure fit.

7. Practice Safe Handling:

- Always treat your firearm as if it is loaded.
- Keep the muzzle pointed in a safe direction when drawing or holstering.

Disposal Instructions

- **Product Disposal:** When the product reaches the end of its life, dispose of it in accordance with local regulations.
- **Environmental Considerations:** Recycle components where applicable to minimize environmental impact.
