

EIDOLON HOLSTERS AGENCY KIT FOR GLOCK® - RAVEN CONCEALMENT SYSTEMS G19 EIDOLON AGENCY KIT TALL SHIELD BLACK

[Home](#)

The Raven Concealment Systems Eidolon Agency (Ambi) Kit is designed to allow government purchasers a simple, single-SKU solution for equipping large numbers of people. This package contains an ambidextrous holster shell along with every accessory and belt-attachment available. This eliminates the need to guess how many left-handed holsters might be needed for a large purchase, while also ensuring that every end-user gets the accessories best-suited to their build and carry-position. This kit is also a tremendous value, since its total price represents a nearly 15% savings compared to purchasing the accessories ala carte. Like the other Eidolon Kits, the Agency (Ambi) Kit is a tuckable, versatile, and comprehensive IWB/AIWB holster package that can be used with one or both belt attachments and give you hundreds of potential configuration options. The Eidolon is the culmination of over three years of design and development. It is designed to be the most refined and functional inside-the-waistband holster on the market. At the core of the Eidolon is the holster shell. The shell is precisely fitted to the weapon on the inside and is smooth on the outside to work in conjunction with the body, belt, and clothing -in nearly any carry position- to maximize comfort and concealment. At the same time, the shell provides attachment points for a host of accessories to allow the user to tailor the holster for their specific carry needs. The holster shells feature an innovative, adjustable retention feature that isolates the tension solely on the front of the trigger guard. This provides for an extremely clean "feel" when drawing and holstering - unlike other companies' adjustable retention holsters which simply compress the holster body along the entire trigger guard and/or frame, resulting in a mushy feel as the pistol drags against the inside of the holster. All Eidolon holster shells are fully compatible with most extended controls, factory and after-market sights of any height (including suppressor sights), any type of RDS mounted behind the ejection port, and most extended/threaded barrels. The Agency (Ambi) Kit includes:

- One ambidextrous holster shell of your specification
- One pair of 1.5" overhooks
- One pair of 1.75" overhooks
- One pair of Tuckable Soft Loops
- One Tall Spacer for mounting the belt attachment below the trigger guard
- One set of Belt Claws
- Two Holster Wedges, one for right-hand and one for left-hand configurations
- Supplemental hardware kit
- Full instruction manual
- One set of eight hole extension wings
- One set of ten hole extension wings

The Glock 19/Universal model has a pass-through open bottom design and will fit any 3rd or 4th Gen. Glock 9mm/.40cal pistol. The holster shell itself is equal in length to a Glock 19 pistol. It is available in short or long body shield configurations. The Glock 17 model has a closed bottom design equal in length to a Glock 17 pistol, but will fit any Glock 26/27/19/23/17/22 3rd or 4th Gen. It is available in short or long body shield configurations.

Included Accessories

Tuckable Overhook Set: Fits 1.5" or 1.75" belts. Can be used as a pair or individually mounted to the holster shell. Overhooks offer two ride height positions 5/8" up or down, and approximately 15 degrees of cant adjustment, forward or back.

Tuckable Soft Loop Set: Can be used as a pair or individually mounted to the holster shell. The polymer struts provide two ride height positions 5/8" up or down and approximately 15 degrees of cant adjustment forward or back. Soft Loops are adjustable, and will fit 1.25", 1.5", and 1.75" belts. The soft loop itself mounts in a slot to allow infinite ride height adjustment within the slot

envelope. The loop itself can be rotated to allow infinite cant adjustments forward and back. Once tightened down, little nibs in the strut face lock the loop in place and prevent movement. Tall Spacer Block: Used to mount the Overhook below the trigger guard to allow the Overhook to clear the holster shell and adjust for cant. Belt Claw Set: This accessory sets the Eidolon apart from all other AIWB holsters on the market. The Belt Claw mounts to the side of the trigger guard area and juts out toward the belt line. As the belt is tightened, it pushes against the Claw and levers the grip of the weapon into the body. The shape of the Claw is designed to blend into the lines of the holster shell for comfort. It also works in conjunction with the angled sight-channel area to allow the holster to conform to the waistline and virtually disappear under cover garments. The serrations on the face of the Claw are meant to "grab" the pants material to minimize holster movement, but are blunted to prevent damage to clothing. Belt Claws come in sets and can be mounted angled up or down to best make contact with the belt line in any cant or configuration for both right and left handed shooters. Holster Wedge: Designed to mount to the inside face of the holster shell toward the muzzle end, the Wedge will help lever the top and grip of the weapon into the body and maximize concealment especially in an AIWB configuration. The Eidolon Holster Wedge is optional, and can be removed if not needed. It is made from a special polymer which is soft enough for all day comfort, yet durable to last the lifetime of the holster.

Eidolon Holsters Agency Kit Safety Instructions

Introduction

Thank you for purchasing the Eidolon Holsters Agency Kit for Glock® Raven Concealment Systems G19. This guide provides essential safety instructions and usage information to ensure your safe and effective use of the product. Please read this guide carefully before using the holster kit.

General Safety Guidelines

- **Product Safety:** Ensure the safe use of the holster kit as it is designed for nonfood products. Always follow the instructions provided.
- **Enhanced Recalls:** Stay informed about any recalls or safety notices related to this product. If you receive a recall notice, please follow the instructions provided.
- **Online Shopping:** If purchased online, confirm that the seller meets safety requirements similar to those of physical stores.
- **Special Consumer Focus:** This product is designed for adult users. Extra care should be taken to keep it out of reach of children.
- **EU Contact Point:** For any safety inquiries, consult the appropriate EU-based contact point.
- **Rapid Alerts:** Monitor updates on unsafe products through the EU Safety Gate system.

Specific Safety Precautions for Use

- **Proper Fit:** Ensure that the holster is compatible with your Glock model. The Eidolon Holster is designed for 3rd and 4th Gen Glock 9mm/.40cal pistols.
- **Retention Feature:** Familiarize yourself with the adjustable retention feature. Ensure that it is set correctly to prevent accidental discharges.
- **Holster Positioning:** Always position the holster in a manner that allows for a smooth draw without obstruction from clothing or other items.
- **Belt Compatibility:** Use only belts that are compatible with the holster's attachment mechanisms (1.5" or 1.75").
- **Regular Inspections:** Regularly inspect the holster and all accessories for wear and tear. Replace any damaged components immediately.
- **Avoid Modifications:** Do not modify the holster or its components. Modifications can compromise safety and performance.
- **Training:** Seek proper training on holster use and firearm safety. Familiarize yourself with drawing and reholstering techniques.

Instructions for Installation and Usage

1. **Unboxing:** Carefully open the package and ensure all components are included:

- One ambidextrous holster shell
- One pair of 1.5" overhooks
- One pair of 1.75" overhooks
- One pair of Tuckable Soft Loops
- One Tall Spacer
- One set of Belt Claws
- Two Holster Wedges
- Supplemental hardware kit
- Full instruction manual
- One set of eight hole extension wings
- One set of ten hole extension wings

2. **Holster Assembly:**

- Select the appropriate components based on your preference for carry style (IWB or AIWB).
- Attach the chosen belt attachments (overhooks or soft loops) to the holster shell.
- Use the Tall Spacer if necessary to ensure proper clearance below the trigger guard.

3. **Adjusting Retention:**

- Adjust the retention feature to your preference. Test the draw and reholster to ensure it feels secure yet allows for a smooth operation.

4. **Wearing the Holster:**

- Position the holster on your body according to your preferred carry style.
- Ensure that the holster is secured and does not shift during movement.

5. **Removing the Holster:**

- When removing the holster, ensure the firearm is clear and pointed in a safe direction.
- Detach the holster from your belt or clothing carefully.

Disposal Instructions

- **Environmental Responsibility:** Dispose of the holster and its components in accordance with local regulations.
- **Recycling:** If applicable, recycle any plastic components according to local recycling guidelines.
- **NonRecyclable Items:** Dispose of nonrecyclable items in your regular waste.

Contact Information for Further Support

For further assistance or inquiries regarding the Eidolon Holsters Agency Kit, please refer to the product manual or visit the manufacturer's website for additional resources.

Thank you for following these safety instructions. Your safety and satisfaction are our top priorities. Enjoy your Eidolon Holsters Agency Kit responsibly!
