Safety Instruction Guide for CUSTOM GRADE HANDGUN 3DIE SETS 38 S&W 3DIE SET

Introduction

Thank you for choosing the Hornady Custom Grade 3Die Set for your reloading needs. This guide provides essential safety instructions and guidelines to ensure safe and effective use of the product. Please read this document carefully before using the die set.

General Safety Guidelines

- Ensure that all users of the die set are familiar with safe reloading practices.
- Always wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, when handling reloading equipment.
- Keep the die set and all reloading components out of reach of children and unauthorized individuals.
- Inspect the die set for any damage or wear before each use. Do not use if damaged.
- Store the die set in a dry and secure location to prevent accidental damage or misuse.
- Follow local laws and regulations regarding the use and storage of reloading equipment and ammunition.

Specific Safety Precautions for Use

- Always work in a wellventilated area to avoid inhaling any potentially harmful substances.
- Avoid distractions while reloading. Focus on the task at hand to prevent accidents.
- Ensure that the work surface is clean, stable, and free from clutter.
- Do not exceed the recommended load data provided by the bullet and powder manufacturers.
- Always doublecheck measurements and adjustments before proceeding with reloading.
- Use the die set as intended; do not modify or alter any components.
- Be aware of the potential hazards associated with handling primers, powders, and ammunition.

Instructions for Installation and Usage

1. Installation of the Die Set:

- Begin by cleaning the reloading press and ensuring it is free from debris.
- Install the full length sizer die in the press according to the manufacturer's instructions.
- Next, install the expander die, ensuring it is properly aligned.
- Finally, install the bullet seater die with builtin crimp, following the same alignment checks.

2. Adjusting the Dies:

- For the sizer die, adjust the die until it contacts the shell holder when the ram is at its highest position.
- Set the expander die to the desired depth for proper bullet seating.
- Adjust the bullet seater die to achieve the correct overall cartridge length as specified in your reloading data.

3. Reloading Process:

- Start with the sizing operation, ensuring each case is resized properly.
- Proceed to the expanding step, making sure the case mouth is adequately flared.
- After inserting the powder charge, place the bullet in the case and use the bullet seater die to seat it to the specified depth.
- Finally, apply crimping as necessary to secure the bullet in place.

4. Final Inspection:

- Inspect each completed cartridge for proper seating and crimping.
- Check for any visible defects before storing or using the ammunition.

Disposal Instructions

- Dispose of any damaged or worn components of the die set in accordance with local regulations.
- Do not dispose of reloading materials like spent primers, powder, or cartridges in regular trash. Follow local guidelines for hazardous waste disposal.
- Ensure that all empty containers and packaging are recycled or disposed of properly.

Contact Information for Further Support
