[Shooting Accessories](#) > [Flashlights & Accessories](#) > [Flashlight Mounts](#)

Impact Weapons Components is a company known for high quality light mounts including these two purpose built light mounts for the Benelli M4 shotgun. Available in either a 1913 Picatinny version for mounting of rail mount type weapons lights, or model that specifically mates up with Surefire Scout weapons lights. Both models allow for mounting of weapon lights either at the 1:00 or 11:00 position, and include ambidextrous limited rotation QD sling mounts eliminating the need for the factory sling loop. IWC's Rotational Clamp incorporating their proprietary Circumferential Locking Tab securely attaches the weapons light mount to the snap ring groove on the barrel hanger lug, eliminating any possibility for the light mount to come off under any condition. CNC Machined from Billet 6061-T6 Aluminum and Black Type III Mil-Spec Anodized finish. Simplistic two-piece design improves reliability, eliminates complexity and reduces weight. Ease of Install. Only one tool needed for installation, 9/64" Hex Key used to install 8-32" Fasteners for secure attachment. Simplistic, reliable, ultra-lightweight design contains only the materials needed to meet the objective; attaching a light to the Benelli M4 Weapon System.
