

# INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC - AREA 419

## INTERCHANGEABLE FUNNEL HEAD FOR UNIVERSAL PISTOL

[Reloading](#) > [Powder Handling](#) > [Powder Funnels](#)

AREA 419 INTERCHANGEABLE FUNNEL HEADS CALIBER SPECIFIC This product listing is for a caliber specific funnel HEAD ONLY, no funnel or billet storage block included. The Area 419 billet aluminum powder funnel uses a system of interchangeable, caliber specific, heads to make it the ultimate funnel for reloaders available today. Universal plastic powder funnels have several issues that are solved with this system. Static cling, plastic is prone to being charged with static and kernels of powder will stick to the walls causing you to have to tap the funnel to get them all to fall. No such thing as universal. There are always cases that just won't work well with the universal design, and funnels tip off and spill powder, or they just plain won't work. Universal means that it has a hole meant for 22 caliber. So, if you are trying to dump 90 grains into a big magnum, you are waiting a long time for the powder to fill. The Area 419 Funnel's interchangeable heads thread onto the funnel and are neck diameter specific for each caliber (color coded to keep track of them). They do not rely on fitting over the body of the case to hold in place. They are sized slightly larger than the neck diameter so that they hold solid on the case. Each head has a bore sized a few thousandths smaller than the bullet diameter, so maximum flow is achieved for each caliber. This is huge for the super ultra magnum guys (375 Cheytac, 408 Cheytac, 50 BMG, etc.). The interface between the heads and the funnel is designed in such a way that no kernels can ever get stuck between the two, as long as the head is tightened completely. The Funnel's design is both aesthetic and performance driven. Being machined from a solid billet of 6061-T6 aluminum means no static charge to cling kernels to the funnel walls. This also makes it far safer for use with black powder. "Flutes" on the outside are for looks on the inside though, they disturb the powder kernels from trying to jam up at the neck. It also gives some airspace, so they do not get packed up so tightly, all aimed to increase flow through the nozzle. 3/8" tall straight section at the top to help prevent kernels of powder from bouncing out when poured in. Smooth surfaces at the neck of the funnel and inside the heads promote quick flow and prevent any sticking kernels. MADE IN USA! From USA made aluminum, on a USA made HAAS mill, with USA made cutting tools! SPECIFICATIONS: Weight: .1 lbs. Dimensions: .8 x .8 x .8 in Caliber: 17 CAL, 20 CAL, 22 CAL, 6MM/243, 25 CAL, 6.5MM/264, 270 CAL, 7MM/284, 30CAL, 338 CAL, 375 CAL, 408 CAL, 450 Rifle, 50BMG, Dillon Powder Die, Pistol, 3" Drop Tube

# Safety Instruction Guide for AREA 419 Interchangeable Funnel Heads

## Introduction

Thank you for choosing the AREA 419 Interchangeable Funnel Heads. This product is designed to enhance your reloading experience with its caliberspecific features and highquality materials. To ensure your safety and the longevity of your product, please read and follow this safety instruction guide carefully.

## General Safety Guidelines

- Always use the funnel heads in accordance with the manufacturer's instructions.
- Inspect the funnel heads for any signs of damage or wear before each use.
- Keep the product out of reach of children and vulnerable individuals.
- Use the product only for its intended purpose as described in the product description.
- Report any unsafe product conditions to the relevant authorities.
- Stay informed about product recalls and safety updates through the EU's Safety Gate platform.

## Specific Safety Precautions for Use

- Ensure that the funnel head is securely threaded onto the funnel before use to prevent spills.
- Avoid overfilling the funnel to minimize the risk of powder spillage.
- Use the funnel heads only with the specified calibers to ensure proper fit and function.
- Handle all reloading materials, including powders, with care and in accordance with safety guidelines.
- Do not use the funnel heads if they show signs of damage or if they do not fit properly on the funnel.
- Be cautious of static electricity when using plastic funnels; the AREA 419 funnel heads are designed to minimize this risk.

## Instructions for Installation and Usage

### 1. Installation of Funnel Head:

- Select the appropriate caliberspecific funnel head.
- Align the threads of the funnel head with the funnel.
- Gently thread the funnel head onto the funnel until it is securely in place. Ensure it is tightened completely to avoid any gaps.

### 2. Using the Funnel:

- Position the funnel over the case you wish to fill.
- Pour the powder slowly into the funnel, ensuring that the flow is consistent and controlled.
- If using a large quantity of powder, consider filling in smaller increments to prevent overflow.

### 3. PostUse Care:

- After use, clean the funnel head and funnel with a suitable brush or cloth to remove any residue.
- Store the funnel heads in a dry, safe location away from children and pets.
- Regularly inspect the funnel heads for any signs of wear or damage.

## Disposal Instructions

- Dispose of any damaged or worn funnel heads in accordance with local regulations.
- Do not throw funnel heads in regular household waste if they are made of materials that can be recycled.

- Check local recycling guidelines.
- Ensure that all powders and reloading materials are disposed of safely and in accordance with local hazardous waste regulations.

## Contact Information for Further Support

For any questions or concerns regarding the AREA 419 Interchangeable Funnel Heads, please refer to the manufacturer's website or contact customer support through the provided channels.

By adhering to these safety guidelines and instructions, you can ensure a safe and effective reloading experience with your AREA 419 Interchangeable Funnel Heads. Thank you for your attention to safety, and happy reloading!
