State-of-the-Art Stock Technology

The KRG Whiskey-3 Chassis (W3C) is one of the premier chassis available for your bolt action precision rifle. The W3C combines precise aluminum bedding with tool-less adjustments, durability, and excellent ergonomics. Right out of the box it allows the use of AICS style magazines (not included) in your rifle without any special bottom metal. Numerous types of accessories can be added to the many attachment points, including handstops, sling mounts, rails, bipods, monopods, and more. KRG's modular grip panels allow the shooter to tailor the fit of the stock to his/her hand which, combined with the other adjustments, yield a stock set up exactly as it needs to be for that particular shooter. The latest Generation (6) features a new length-of-pull locking mechanism that is a bit more streamlined than previous generations and allows for faster adjustments. The Tikka inlet accepts T3, T3x, and CTR versions (basically all short action caliber T3 variants). Tikka rifles accept AICS pattern mags with the exception of the Magpul AICS polymer mags.
