Effectively Seals Your Tavor Ejection Port

Still getting gas leakage from your sealed-off Tavor ejection port? This persistent issue bothered the team at Manticore Arms, too, so they developed their Tavor Gasketed Port Cover to provide a truly firm and gas-proof seal. The Manticore Arms Gasketed Port Cover is built using 6061 aluminum and features an interior and exterior panel with a rubber gasket placed between each panel. The two panels are tightened together by two screws, which compresses the rubber gasket in the middle and provides a better compression seal against gas flow. Other features in the Manticore Arms Gasketed Port Cover includes a quick-detach sling-swivel pocket, as well as fully ambidextrous compatibility. Each port cover is made in the USA and ships with all the tools needed for installation.

TAVOR GASKETED PORT COVER SAFETY INSTRUCTION GUIDE

Introduction

Thank you for choosing the Tavor Gasketed Port Cover by Manticore Arms. This product is designed to enhance the performance of your Tavor firearm by providing a secure and gasproof seal for the ejection port. To ensure your safety and the proper use of this product, please read and follow the instructions and guidelines outlined in this document.

General Safety Guidelines

- Ensure the product is suitable for your specific Tavor model before installation.
- Always handle firearms and accessories safely and responsibly.
- Keep all tools and installation components out of reach of children and pets.
- Inspect the product for any visible damage before use. Do not use if damaged.
- Always wear appropriate safety gear when handling firearms, including eye protection.
- Store the Tavor Gasketed Port Cover in a safe, dry place when not in use.

Specific Safety Precautions for Use

- Do not modify the Tavor Gasketed Port Cover or any of its components.
- Ensure that the rubber gasket is properly seated between the interior and exterior panels during installation.
- Tighten screws evenly to avoid overcompressing the rubber gasket, which could lead to damage.
- Regularly check for gas leakage during use and inspect the port cover for wear and tear.
- If you notice any issues, discontinue use immediately and consult a qualified gunsmith.

Instructions for Installation and Usage

1. **Gather Tools and Materials:** Ensure you have all the necessary tools for installation, including the screws provided with the port cover.
2. **Remove Existing Port Cover:** If applicable, carefully remove the existing ejection port cover from your Tavor.
3. **Prepare the Tavor Gasketed Port Cover:**
 - Lay the interior panel flat and place the rubber gasket on it.
 - Align the exterior panel on top of the rubber gasket.
4. **Secure the Panels:**
 - Insert the screws through the exterior panel and into the interior panel.
 - Tighten the screws evenly to compress the rubber gasket without overtightening.
5. **Check Installation:**
 - Ensure that the port cover is securely in place and that there are no gaps.
 - Confirm that the quickdetach slingswivel pocket is accessible and functioning properly.
6. **Test for Gas Leakage:**
 - Before using your firearm, conduct a test to ensure that the Tavor Gasketed Port Cover is effectively sealing the ejection port.

- If gas leakage is detected, recheck the installation and tighten screws as necessary.

Disposal Instructions

- Dispose of the Tavor Gasketed Port Cover and any packaging materials in accordance with local regulations.
- Do not dispose of the product in household waste. Check for recycling options or designated disposal facilities.

Contact Information for Further Support

For any questions or concerns regarding the Tavor Gasketed Port Cover, please refer to the product packaging or visit the manufacturer's website for more information. Always ensure that you have the latest updates and safety notices regarding your product.

Thank you for your attention to these safety instructions. Enjoy using your Tavor Gasketed Port Cover responsibly!
