

BAR BARREL NUT FOR AR-15 - AERO PRECISION BAR BARREL NUT FOR AR-15 BLACK

[Rifle Parts](#) > [Barrel Parts](#) > [Rifle Barrel Hardware](#) > [Barrel Nuts](#)

An Attachment Point for Your Aero Precision Handguard

Got your hands on an Aero Precision handguard you're looking to put onto your AR-15? Grab Aero Precision's AR-15 BAR Barrel Nut, designed specifically to interface with all of Aero Precision's Enhanced handguards when used for installation on a mil-spec, threaded upper receiver. This Aero Precision AR-15 BAR Barrel Nut is purpose-built for use with the company's M4E1 Enhanced Upper Receiver, but the nut will work with pretty much any mil-spec AR upper receiver on the market. Each barrel nut is machined from 7075-T6 aluminum and includes 4 shims to aid in installation. Total weight on the barrel nut is 2.24 ounces. **INCLUDES:** BAR Barrel Nut BAR Shim Pack (8 shims) **FEATURES:** Material: Machined from Billet 7075-T6 Aluminum Coating: Anodized Black Torque with standard AR15 armorer's wrench (Does not work with Magpul® Armorer's Wrench) Supports Mil-Spec AR-15 barrels with outer diameters up to .998" Please Note: All Aero Precision Handguards use the BAR interface. If you intend to connect an Aero Precision Handguard to a standard threaded upper receiver, you will need a Bar Barrel Nut. If you have Aero Precision's M4E1 Enhanced Upper Receiver, you do not need a BAR Barrel Nut as the barrel nut and rail mounting platform are forged directly on to the upper receiver itself. *Recommended torque settings between 30 - 45 ft lbs. Torque over 45 ft lbs may result in damage to the barrel nut.

Attributes

- Name: [AERO PRECISION BAR BARREL NUT FOR AR-15 BLACK](#)
- Manufacturer: [AERO PRECISION](#)
- Product no.: 100034681
- Mfr. No.: APRH100268

Safety Instruction Guide for BAR Barrel Nut for AR15 Aero Precision

Introduction

Thank you for choosing the BAR Barrel Nut for your AR15. This safety instruction guide is designed to ensure the safe and effective use of the product in compliance with the EU General Product Safety Regulation (GPSR). Please read this guide carefully before installation and use.

General Safety Guidelines

- Ensure that the BAR Barrel Nut is compatible with your specific AR15 model before installation.
- Always handle the product with care to avoid injury and ensure proper installation.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for any signs of wear or damage to the barrel nut and associated components.
- If you experience any issues during installation or use, discontinue use immediately and seek assistance.

Specific Safety Precautions for Use

- Use only the recommended tools for installation, specifically a standard AR15 armorer's wrench. Avoid using the Magpul Armorer's Wrench as it is not compatible.
- Ensure that the torque settings during installation are between 30-45 ft lbs. Exceeding 45 ft lbs may cause damage to the barrel nut.
- Do not exceed the maximum outer diameter of .998" for AR15 barrels when using this barrel nut.
- If you are using a standard threaded upper receiver, ensure you have the BAR Barrel Nut for proper installation.
- For users with Aero Precision's M4E1 Enhanced Upper Receiver, note that the barrel nut is integrated and does not require a separate BAR Barrel Nut.

Instructions for Installation and Usage

1. Preparation:

- Gather necessary tools: standard AR15 armorer's wrench, BAR Barrel Nut, and shims from the included shim pack.
- Ensure your workspace is clean and well lit.

2. Installation Steps:

- Align the BAR Barrel Nut with the threads of your upper receiver.
- Place shims as needed to achieve a proper fit.
- Using the standard AR15 armorer's wrench, tighten the barrel nut to the recommended torque settings (30-45 ft lbs).
- Doublecheck the alignment and fit of the handguard with the installed barrel nut.

3. Post Installation:

- Inspect the installation to ensure no components are loose or misaligned.
- Test the handguard for stability and security before use.

Disposal Instructions

- Dispose of any packaging materials responsibly, following local waste disposal regulations.
- If the BAR Barrel Nut becomes damaged or is no longer usable, dispose of it in accordance with local electronic waste disposal guidelines.

Contact Information for Further Support

For any safety inquiries, product support, or to report unsafe products, please contact the designated EUbased support channels.

Conclusion

By following these safety instructions, you can ensure the safe and effective use of the BAR Barrel Nut for your AR15. Always prioritize safety and compliance with regulations to enhance your experience with this product. Thank you for your attention to these guidelines.
