

AR .308 M5 BAR BARREL NUT KITS - AERO PRECISION M5E1 HANDGUARD BAR BARREL NUT KIT DPMS THREAD FOR AR-308 BLK

[Rifle Parts](#) > [Build Kits](#) > [Handguards & Rails](#)

The M5E1 Handguard Barrel Nut is used to connect Aero Precision M5 Enhanced Handguards to DPMS pattern threaded upper receivers. This product comes with 5 shims to properly time the gas tube with the upper receiver. Includes: M5E1 Handguard Barrel Nut Shim Pack (5 shims) Features: Material: Machined from 1144 Stressproof® Steel Coating: QPQ/Melonite Torque to 65 ft lbs with a standard AR15 armorer's wrench Weights: 5.4oz Please Note: If you intend to connect an Aero Precision Handguard to a standard threaded upper receiver, you will need a M5E1 Handguard Barrel Nut. You will need to select between an Aero/DPMS threaded barrel nut and an Armalite threaded barrel nut, depending on your upper receiver. If you have an Aero Precision M5E1 Enhanced Upper Receiver, you do not need a M5E1 Handguard Barrel Nut as the barrel nut and rail mounting platform are forged directly on to the upper receiver itself.

Safety Instruction Guide for AR .308 M5 BAR Barrel Nut Kits

Introduction

Thank you for choosing the AR .308 M5 Barrel Nut Kit by Aero Precision. This guide provides essential safety information, usage instructions, and disposal practices to ensure safe handling and operation of your product. Please read this guide carefully before use.

General Safety Guidelines

- Ensure that all parts are compatible with your firearm before installation.
- Always wear appropriate safety gear, including eye protection, when handling firearm components.
- Keep the product and all tools out of reach of children and unauthorized users.
- Regularly inspect the product for signs of wear or damage before use.
- If you experience any issues during installation or usage, seek professional assistance.

Specific Safety Precautions for Use

- Use only the recommended torque settings when installing the barrel nut to avoid damage.
- Ensure that all shims are properly installed to prevent gas tube misalignment.
- Do not exceed the specified torque of 65 ftlbs when tightening the barrel nut.
- Always handle the firearm in a safe manner, following all local laws and regulations.
- If you are unsure about any aspect of installation or use, consult a qualified gunsmith.

Instructions for Installation and Usage

1. Preparation

- Gather all necessary tools, including a standard AR15 armorer's wrench.
- Ensure you have the M5E1 Handguard Barrel Nut and shim pack (5 shims) ready.

2. Installation Steps

- Remove the existing handguard and barrel nut from your upper receiver.
- Clean the threads of the upper receiver to ensure a proper fit.
- Select the appropriate shim from the shim pack based on your setup.
- Place the shim onto the upper receiver, ensuring it is seated properly.
- Position the M5E1 Handguard Barrel Nut over the shim.
- Use the AR15 armorer's wrench to tighten the barrel nut to a torque of 65 ftlbs.
- Ensure the gas tube is properly aligned with the upper receiver.

3. PostInstallation Checks

- Verify that the handguard is securely attached and there is no movement.
- Check that the gas tube is properly timed and not obstructed.

Disposal Instructions

- Dispose of the product in accordance with local regulations.
- Do not dispose of in regular household waste.
- Contact your local waste management facility for guidance on proper disposal methods.

Contact Information for Further Support

For questions or concerns regarding the safety and use of the AR .308 M5 Barrel Nut Kit, please reach out to your local retailer or consult a qualified gunsmith for assistance.

By following these guidelines, you can ensure safe and effective use of your AR .308 M5 Barrel Nut Kit. Thank you for prioritizing safety.
