

308 COLLAPSIBLE PRECISION STOCKS - B5 SYSTEMS COLLAPSIBLE PRECISION STOCK BLACK- SHORT

[Rifle Parts](#) > [Stock Parts](#) > [Buttstocks](#)

The Precision Stock for AR platform rifles from B5 Systems is redefining what a precision stock really is. Designed to allow for a toolless, fine adjustment of both length of pull and cheek height, the B5 Systems Precision Stock is unique in that it mounts to a carbine or A5 receiver extension to offer greater length of pull adjustability not afforded in other stocks. And not only can you quickly adjust the length of pull with the low profile, no-snap latch, but once you have it set where you need it the latch can be locked in ensuring that's set exactly where you want and need it. Another feature that is unique for a precision stock is that the B5 Systems Precision Stock is compatible with the Law Tactical Folding Stock Adapter for when you need compact or concealed transport options. The front "nose" of the Precision Stock is slanted and shortened to allowing for single point sling use when the stock is collapsed. Sling mounting options are plentiful with left and right limited rotation steel QD cups, as well as two fixed sling mounts. Underneath you'll find M-LOK attachment sections for mounting of monopods or other attachments. The B5 Systems Precision Stock will come in two models with one designed specifically for the AR-15 and one designed for the ARs in 7.62 or 6.5CM. The difference between the two lies in the length of the cheek piece with each model allow for platform correct full usage of the charging handle with the cheek piece in the raised position.
