

AR ENHANCED CARBINE BUFFER TUBE - AERO PRECISION AR ENHANCED CARBINE BUFFER TUBE BLACK

[Rifle Parts](#) > [Receiver Parts](#) > [Buffer Tube Parts](#) > [Buffer Tubes](#)

An Enhanced Buffer-Tube Design for Your AR-15

Your AR-15's buffer tube is just a tube...right? Well, why can't it do more than just hold your gun's buffer and buffer spring? That's what Aero Precision engineers thought, so the company developed its innovative AR Enhanced Carbine Buffer Tube. The Aero Precision AR Enhanced Carbine Buffer Tube features a few special highlights designed to improve your gun's functionality. Aero Precision first added Carrier Support Extensions into the tube, which are designed to guide the bolt-carrier group into the tube after a round is fired. This prevents carrier tilt and minimizes wear on key components, ensuring that your gun lasts longer. The support extensions also secure the buffer retaining pin into place and also ensures that the buffer tube won't back out under heavy recoil. Also found on the Aero Precision Enhanced Carbine Buffer Tube are Position Guide Drain Holes, which are designed to quickly remove water from your gun's operating system if you're hunting or shooting in waterlogged environments. In dry shooting conditions, the holes also allow air to escape during the compression cycle of the buffer, leading to improved reliability. Other features found on the Aero Precision Enhanced Carbine Buffer Tube include a ramped tube design, which allows for easier installation of standard carbine buttstocks. The tubes are guaranteed to have the correct thread depth, so your stock won't become stuck on exposed threads when collapsed.

Attributes

- Name: [AERO PRECISION AR ENHANCED CARBINE BUFFER TUBE BLACK](#)
- Manufacturer: [AERO PRECISION](#)
- Product no.: 100039047
- Mfr. No.: APRH101227C
- Style: Carbine
- Weapon type: AR-15
- Delivery weight: 0.127kg
- Shipping height: 38mm
- Shipping width: 38mm
- Shipping length: 235mm
- UPC: 815421028249

Item details

Made in USA

US export classification: 0A501.y.1

AR Enhanced Carbine Buffer Tube Safety Instructions

Introduction

Thank you for choosing the Aero Precision AR Enhanced Carbine Buffer Tube. This product is designed to enhance the functionality of your AR15 while ensuring safe and reliable operation. Please read this safety instruction guide carefully to understand how to use, install, and maintain your buffer tube safely.

General Safety Guidelines

- Ensure that you are familiar with the operation of your AR15 before installing or using the buffer tube.
- Always handle firearms with care and follow all safety protocols associated with gun handling.
- Keep the buffer tube and all firearm components out of reach of children and unauthorized users.
- Regularly inspect your buffer tube for any signs of wear or damage before use.
- In case of any malfunction or unusual operation, stop using the product immediately and seek professional assistance.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- **Carrier Support Extensions:** The buffer tube features Carrier Support Extensions designed to guide the boltcarrier group into the tube. Ensure these extensions are not obstructed during operation to prevent carrier tilt.
- **Position Guide Drain Holes:** These holes are designed to remove water quickly. Ensure they are clear of debris to maintain proper functionality, especially in wet conditions.
- **Recoil Management:** The buffer tube is designed to secure the buffer retaining pin. Ensure it is properly installed to avoid any movement during heavy recoil.
- **Installation of Buttstocks:** When installing standard carbine buttstocks, ensure that the tube has the correct thread depth to avoid stock jamming on exposed threads.

Instructions for Installation and Usage

1. Installation:

- Begin by ensuring your AR15 is unloaded and safe.
- Remove the existing buffer tube if applicable.
- Align the Aero Precision AR Enhanced Carbine Buffer Tube with the receiver extension.
- Thread the buffer tube into the receiver until it is securely in place.
- Ensure that the Carrier Support Extensions are properly aligned and unobstructed.
- Install the buffer retaining pin and ensure it is secured.

2. Usage:

- Before firing, check that the buffer tube is securely installed.
- During operation, periodically check for any signs of wear or damage.
- If using in wet conditions, ensure the Position Guide Drain Holes are clear for optimal performance.

Disposal Instructions

- Dispose of the Aero Precision AR Enhanced Carbine Buffer Tube in accordance with local regulations.
- Do not dispose of the product in general waste. Check with local authorities for proper disposal methods of firearm components.

Contact Information for Further Support

For any questions or concerns regarding the Aero Precision AR Enhanced Carbine Buffer Tube, please refer to the product packaging for the appropriate contact information within the EU. Ensure you have your product details ready for any inquiries.

Thank you for your attention to these safety instructions. Your safety and the safe operation of your firearm are our top priorities. Enjoy using your Aero Precision AR Enhanced Carbine Buffer Tube responsibly.
