Introducing the TTU, an all-new modular trigger unit that is easily user installed in any AR pattern rifle in less than 1 minute. Exclusive Wilson Combat engineering enables a durable, 4 lb., ultra-crisp trigger pull without any fine tuning or adjustment. Reduced, positive trigger reset guarantees a quick follow up shot on target. The unique hammer geometry enhances reliable ignition with military and surplus ammunition of all types while a 1911 style half-cock notch allows the TTU to meet or exceed military specifications for drop safety. Pre-assembled, CNC machined trigger housing contains H13 heat-treated trigger, hammer, sear and a stainless-steel spring for trouble-free installation. Bullet Proof designed and extensively tested by shooters for shooters, the new Tactical Trigger Unit has raised the bar for drop-in AR triggers. Wilson Combat has developed a new pistol caliber compatible, match grade AR trigger that solves the durability and reliability issues caused by excessive bolt speed in many pistol caliber, blowback AR carbines. This new TTU model is compatible with all pistol caliber carbines that accept AR-15 style triggers with .154" pinholes. Because of the short, fast reset of the TTU, always use a firm grip and solid hold when shooting from the bench or prone to ensure that bump firing does not occur. NO Adjustment Screws to Ever Shoot Loose NO Loose Parts to Misplace, The TTU Is a Totally Self-Contained Trigger Module All Components Are Precision CNC Machined and/or EDM Cut From Solid Bar Stock Hammer, Trigger and Disconnecter Are Manufactured From Virtually Indestructible H13 Steel and Heat Treated For Maximum Wear Resistance Hammer, Trigger and Disconnecter Pivot on Hardened Steel Bushings So NO Wear or Stress Is Imparted on Your Receiver Pin Holes or Pins Positive Trigger Reset Guarantees a Quick Follow Up Shot on Target The Unique Hammer Geometry Enhances Reliable Ignition With Military and Surplus Ammunition of All Types Wilson Combat® Exclusive 1911 Style Half-Cock Notch Makes The TTU The Safest AR Trigger on The Market and Allows The TTU to Meet or Exceed Military Specifications For Drop Safety Bullet Proof® Design Is Engineered and Extensively Tested By Shooters For Shooters Wilson Combat AR-15 Tactical Trigger units will reliably function in any standard USGI style AR style lower receiver with standard GI trigger pins of .154" diameter regardless of caliber, including 7.62/.308 length AR receivers. Colt brand rifles made for commercial use between 1991 and 2009 will generally have a proprietary trigger pin size of .169" and are not compatible with any Wilson TTU. Colt rifles produced with pinned-in sear blocks are not compatible with any Wilson TTU. Wilson Combat TTU is not compatible with the Bushmaster ACR. The MR556 and any other AR style rifle with a firing pin safety mechanism in the bolt carrier is only compatible with the TTU 3G (TR-TTU-3G) or Two Stage Models (TR-TTU-M2). With .22 LR AR conversions or complete .22LR caliber AR-pattern rifles it is recommended that the standard single stage TTU (TR-TTU) or two stage TTU (TR-TTU-M2) trigger be used along with high or hyper-velocity ammunition for best reliability. The TTU is compatible with the S&W MP-10 .308 AR but the rifle's ambidextrous bolt catch must first be removed to install the trigger unit. The TR-TTU-9MM is compatible with Sig MPX
