The Align Tactical™ OFFSET EXTENDED MAGAZINE RELEASE allows the operator to rest their distal middle finger flush across the lower half of where the Sig Sauer® P320 (M17/M18)® factory magazine release's triangular bottom edge would be, eliminating side-finger chafing when choking up high on the pistol grip for increased recoil control. Ergonomically designed with an enhanced and extended engagement surface closer to the thumb, for minimizing/eliminating pistol shifting in-hand when reaching to eject magazines. Obtain the highest grip with an unobstructed undercut that allows natural finger placement, thereby reducing muzzle flip to return the sights back to target quicker for a competitive edge. Eliminate side-finger chafing when choking up high on the pistol grip. The OFFSET design allows resting the distal middle finger flush across the lower half of where the factory magazine release's triangular bottom corner edge would be. Increased leverage helps maintain a firing grip without having to shift the pistol in-hand during reloads. An enlarged button surface protrudes 2mm (0.08") farther and is relocated higher up the grip frame to provide positive engagement while reducing thumb travel. Align Tactical's OFFSET Extended Magazine Release is compatible with Sig Sauer® P320/P250® standard, X-Series® (including Legion®), and Wilson Combat® WCP320 grip frames. Asymmetric (specific to either right or left-handed use). Hardened steel part finished in Black Oxide. Made in USA with lifetime warranty. Compatibility: Sig Sauer® P320/P250® standard and X-Series®, Wilson Combat WCP320® grip frames *Holsters that cover the magazine release may require minor relief for use
