LEO® Gen II Telescoping Stock Adapter for Rem 870 (12-GA only) Mesa Tactical's LEO® Gen II Telescoping Stock adapter and pistol grip system for the Remington 870 shotgun is made specifically with law enforcement in mind. The LEO Stock adapter system is designed to allow shooters the ability to fit AR style collapsible stocks and pistol grips onto their shotguns, while allowing use of open or bead sights. The versatile telescoping stock adapter system can be fitted with a standard AR-15 grip and telescoping stock, which enables tactical operators to instantly adjust the length of pull of the telescoping stock in order to accommodate differences in individual body sizes or use of body armor. With Mesa Tactical's telescoping stock systems, the shotgun's factory stock is replaced by an investment cast aluminum adapter, to which standard AR-15 grips and telescoping buttstocks can be reliably attached. The LEO stock adapters provide a lower stock elevation allowing the use of iron sights or the front bead. All Mesa Tactical stock adapters incorporate multiple sling attachment methods. The LEO Gen II Telescoping Stock Adapter for the Remington 870 shotgun is the first of Mesa Tactical's "Generation II" LEO adapters. The LEO adapter's second generation has been completely redesigned for increased comfort, superior handling and configuration versatility: The new adapter is slightly shorter and more compact than the earlier LEO adapters. The pistol grip has been angled forward several degrees, similar to the angle of an M1911 pistol grip, to provide more space for the webbing of the operator's thumb above and behind the grip. The enhanced grip angle allows the use of highly comfortable beavertail AR-15 grips such as the ERGO Grip (which included the complete LEO Gen II Stock Kits). The LEO Gen II Telescoping Stock Adapter end plate engages the adapter low on the sides instead of at the top, so operators are less likely to come into contact with it under recoil. All LEO Gen II Telescoping Stock Adapters include Mesa Tactical's innovative (and widely copied) pocket hook loops and sling loops. The LEO adapter is available in three types of kits, adapter kits, recoil starter packs or complete stock kits. Mesa Tactical's upgraded versions include a hydraulic recoil buffer which replaces the standard receiver extension tube normally used with AR-15 style telescoping stock assemblies. The recoil buffer is manufactured for Mesa Tactical by Kynotec. The Kynshot Hydraulic Buffer (Mil-spec) is a recoil reducer designed for professional operators who require optimum accuracy and control. Notices will be circulated to customers on the waiting list for the product this week. LEO Stock Adapter Product Features: Adapts AR-15 style buttstocks and pistol grips for use with Remington 870, Mossberg 500/590 and Beretta 1301 shotguns. Stock adapters are investment cast aircraft grade aluminum, CNC machined and powdercoated black with a tough, chemical resistant finish. Adjustable length-of-pull (LoP) to fit shooter's stature or for use with body armor and other equipment. Optional Kynshot™ Hydraulic Recoil Buffer reduces felt recoil by up to 70%. Gives the shotgun similar handling characteristics to the AR-15. Collapsible stock makes shotgun easier to stow, transport and deploy. Pistol grip configuration allows increased control and user comfort. Sling attachment points included. Optional SureShell® aluminum carriers can be added to the M4 Carbine buttstock. No gunsmithing required

Attributes

REMINGTON 870 LEO GEN II TELESCOPING STOCK ADAPTER SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the REMINGTON 870 LEO Gen II Telescoping Stock Adapter. This product is designed to enhance your shotgun's functionality while ensuring safety and comfort during use. Please read this safety instruction guide carefully to understand how to use and maintain your product safely.

General Safety Guidelines

- Always treat your shotgun as if it is loaded.
- Keep the shotgun pointed in a safe direction at all times.
- Store the shotgun and the stock adapter in a secure location, out of reach of children and unauthorized users.
- Use only compatible parts and accessories with the REMINGTON 870 LEO Gen II Telescoping Stock Adapter.
- Regularly inspect the stock adapter for any signs of wear or damage before each use.
- Follow all local laws and regulations regarding shotgun use and ownership.
- Be aware of your surroundings and ensure a safe shooting environment.

Specific Safety Precautions for Use

- Ensure that the shotgun is unloaded before installing or adjusting the stock adapter.
- Do not exceed the manufacturer's specifications for weight and compatibility.
- Use the adjustable length of pull feature carefully to avoid sudden changes in stock length during use.
- When using the pistol grip, maintain a firm grip to prevent loss of control.
- Be cautious of the recoil when firing, especially with the hydraulic recoil buffer installed.
- Always wear appropriate safety gear, including eye and ear protection, when shooting.

Instructions for Installation and Usage

Installation

1. **Prepare the Shotgun:** Ensure the shotgun is unloaded and pointed in a safe direction.
2. **Remove the Factory Stock:** Use appropriate tools to detach the factory stock from the shotgun.
3. **Attach the Adapter:**
 - Align the investment cast aluminum adapter with the shotgun's receiver.
 - Securely fasten the adapter according to the manufacturer's instructions to ensure a stable fit.
4. **Install the Pistol Grip and Stock:**
 - Attach a compatible AR15 style pistol grip to the adapter.
 - Connect the telescoping stock securely to the adapter.
5. **Adjust Length of Pull:** Adjust the telescoping stock to the desired length of pull for comfort and control.

Usage

- Practice safe handling and shooting techniques at all times.
- Regularly check the stability of the adapter, grip, and stock during use.
- Make adjustments to the stock length as needed for optimal comfort and control while shooting.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding aluminum and polymer materials.

- If the product is damaged and no longer usable, ensure that it is stored securely until disposal to prevent accidents.

Contact Information for Further Support

For any inquiries regarding safety, installation, or usage of the REMINGTON 870 LEO Gen II Telescoping Stock Adapter, please refer to the manufacturer's website or contact their customer support directly.

By following these safety instructions, you can maximize the performance and safety of your REMINGTON 870 LEO Gen II Telescoping Stock Adapter. Always prioritize safety and responsible usage. Thank you for your attention to these important guidelines.
