[Shotgun Parts](#) > [Stock & Forend Parts](#) > [Buttstocks](#)

Mesa Tactical's LEO® Gen II Telescoping Stock adapter and pistol grip system for the Remington 870 shotgun is made specifically with law enforcement in mind. The LEO Stock adapter system is designed to allow shooters the ability to fit AR style collapsible stocks and pistol grips onto their shotguns, while allowing use of open or bead sights. The versatile telescoping stock adapter system can be fitted with a standard AR-15 grip and telescoping stock, which enables tactical operators to instantly adjust the length of pull of the telescoping stock in order to accommodate differences in individual body sizes or use of body armor. With Mesa Tactical's telescoping stock systems, the shotgun's factory stock is replaced by an investment cast aluminum adapter, to which standard AR-15 grips and telescoping buttstocks can be reliably attached. The LEO stock adapters provide a lower stock elevation allowing the use of iron sights or the front bead. All Mesa Tactical stock adapters incorporate multiple sling attachment methods. The LEO Gen II Telescoping Stock Adapter for the Remington 870 shotgun is the first of Mesa Tactical's "Generation II" LEO adapters. The LEO adapter's second generation has been completely redesigned for increased comfort, superior handling and configuration versatility: The new adapter is slightly shorter and more compact than the earlier LEO adapters. The pistol grip has been angled forward several degrees, similar to the angle of an M1911 pistol grip, to provide more space for the webbing of the operator's thumb above and behind the grip. The enhanced grip angle allows the use of highly comfortable beavertail AR-15 grips such as the ERGO Grip (which is included in the complete LEO Gen II Stock Kits). The LEO Gen II Telescoping Stock Adapter end plate engages the adapter low on the sides instead of at the top, so operators are less likely to come into contact with it under recoil. All LEO Gen II Telescoping Stock Adapters include Mesa Tactical's innovative (and widely copied) pocket hook loops and sling loops. The LEO adapter is available in three types of kits, adapter kits, recoil starter packs or complete stock kits. Mesa Tactical's upgraded versions include a hydraulic recoil buffer which replaces the standard receiver extension tube normally used with AR-15 style telescoping stock assemblies. The recoil buffer is manufactured for Mesa Tactical by Kyntec. The Kynshot Hydraulic Buffer (Mil-spec) is a recoil reducer designed for professional operators who require optimum accuracy and control. Notices will be circulated to customers on the waiting list for the product this week.

**LEO Gen II Stock Adapter Product Features:** Adapts AR-15 style buttstocks and pistol grips for use with Remington 870, Mossberg 500/590 and Beretta 1301 shotguns. Stock adapters are investment cast aircraft grade aluminum, CNC machined and powdercoated black with a tough, chemical resistant finish. Adjustable length-of-pull (LoP) to fit shooter's stature or for use with body armor and other equipment. Optional Kynshot™ Hydraulic Recoil Buffer reduces felt recoil by up to 70%. Gives the shotgun similar handling characteristics to the AR-15. Collapsible stock makes shotgun easier to stow, transport and deploy. Pistol grip configuration allows increased control and user comfort. Sling attachment points included. Optional SureShell® aluminum carriers can be added to the M4 Carbine buttstock. No gunsmithing required. Mesa Tactical's LEO® Telescoping Stock Kit for 12-GA Remington 870 shotguns, is a versatile telescoping stock system which enables tactical

operators to instantly adjust the length of pull of the telescoping stock in order to accommodate differences in individual body sizes, or when wearing body armor, without compromising the safest shooting position. Mesa Tactical's collapsible stock kits and adapters install AR-15 adjustable buttstocks and pistol grips onto the venerable Remington 870 shotgun platforms for the ultimate in tactical shotgun configuration performance. The LEO telescoping stock system also incorporates a new and advanced sling attachment method, which accommodates a wide variety of optional sling styles. The concept is simple: the shotgun stock is replaced by an adapter that mimics the stock attachment point of an AR-15 lower receiver. This adapter accepts an AR-15 receiver buffer tube. The AR-15 collapsible stock and pistol grip can then be reliably attached to the shotgun. Mesa Tactical's LEO stock system incorporates those features most frequently asked for by law enforcement and other professional operators who now have a more streamlined solution for adding a telescoping stock and pistol grip to their Remington Model 870 shotguns, which also retains the same high quality materials and workmanship, and the same strength and durability that's characteristic of all Mesa Tactical products. Departments that are planning to update their existing arsenals of tactical shotguns will also appreciate the considerable cost savings afforded by the availability of the LEO system, and armorers will also appreciate the fact that no gunsmithing is required to install the LEO system or when adding any of its optional accessories. Stock kits additionally include an M4 Carbine style telescoping buttstock assembly, an ERGO pistol grip, a stamped steel stock wrench and a push-button sling swivel. A slip-on rubber butt pad for the M4 Carbine buttstock is available separately.

## Attributes

- Name: [MESA TACTICAL PRODUCTS REM 870 LEO GEN II TELESCOPING STOCK KIT 12G ONLY](#)
- Manufacturer: [MESA TACTICAL PRODUCTS](#)

# Safety Instruction Guide for the REMINGTON 870 LEO GEN II TELESCOPING STOCK KIT

## Introduction

Thank you for choosing the REMINGTON 870 LEO GEN II Telescoping Stock Kit. This product is designed to enhance the functionality and comfort of your Remington 870 shotgun. To ensure your safety and the best performance of your product, please read this safety instruction guide carefully.

## General Safety Guidelines

- Always treat your shotgun as if it is loaded.
- Keep the shotgun pointed in a safe direction at all times.
- Ensure the shotgun is unloaded when installing or adjusting the stock kit.
- Familiarize yourself with local laws and regulations regarding shotgun modifications.
- Use only compatible AR15 style components with this stock kit.
- Regularly inspect the stock kit for signs of wear or damage.
- Store the shotgun and stock kit in a secure location, away from unauthorized users, especially children.
- Report any unsafe products or incidents to the appropriate authorities.

## Specific Safety Precautions for Use

### • Hazard Identification:

- Improper installation may lead to malfunction or injury.
- Use of incompatible components may compromise safety.
- Failure to properly secure the stock may result in detachment during use.

### • Avoiding Hazards:

- Follow all installation instructions carefully.
- Do not modify the stock kit beyond the manufacturer's specifications.
- Ensure all components are properly tightened and secured before use.
- Use the shotgun only in a safe and controlled environment.

### • Age Specific Warnings:

- This product is intended for use by individuals 18 years and older.
- Ensure that younger users are supervised by a qualified adult when handling the shotgun.

## Instructions for Installation and Usage

### 1. Installation:

- Ensure the shotgun is unloaded and pointed in a safe direction.
- Remove the factory stock by unscrewing the stock bolt.
- Attach the Mesa Tactical LEO Gen II Stock Adapter to the shotgun's receiver.
- Secure the adapter with the provided stock bolt, ensuring it is tightened properly.
- Attach the AR15 receiver buffer tube to the stock adapter.
- Install your chosen AR15 buttstock onto the buffer tube.
- Attach the AR15 pistol grip to the adapter.
- Check all connections to ensure they are secure.

## 2. Usage:

- Adjust the length of pull by sliding the telescoping stock to the desired position.
- Ensure that the stock is locked in place before firing.
- Use the shotgun with the appropriate ammunition for the Remington 870.
- Regularly practice safe handling and shooting techniques.

## Disposal Instructions

- Dispose of the stock kit and any packaging materials in accordance with local regulations.
- Do not dispose of the stock kit in regular household waste if it contains hazardous materials.
- Consider recycling components where possible.

## Contact Information for Further Support

For questions or concerns regarding the REMINGTON 870 LEO GEN II Telescoping Stock Kit, please refer to the manufacturer's contact information provided with your product packaging.

Thank you for prioritizing safety and ensuring proper use of your product. Enjoy your enhanced shooting experience with the REMINGTON 870 LEO GEN II Telescoping Stock Kit.
