

# ZERO MODULAR SHELLHOLDER SYSTEM - AREA 419 ZERO MODULAR SHELLHOLDER SYSTEM FOR ZERO PRESS

[Reloading](#) > [Shellholders & Shellplates](#)

Area 419 has done round after round of press testing, both with the ZERO and other presses, we have known that the very best way to get consistent sizing time and again is to have contact between the shellholder and the die. This removes your ability, however, to dial in your shoulder bump – until now. With the new ZERO Modular Shellholder System you can set up your shellholder to your die and have more consistency, more repeatability, and less hassle. It's a win-win-win. Available in either a Zero specific mounting system or a traditional shellholder this allows you to dial in should bump with a set of 6 precision ground stainless steel inserts .002" at a time. The Kit comes with: A Base (meant for ZERO or Traditional presses, your choice) THREE Shellholder/Extractor tops, sized for 223, 308, Standard Magnum (or similar) SIX Precision Ground headspace inserts ranging from +.002" to -.008" Aluminum Storage Block

## Attributes

# ZERO Modular Shellholder System Safety Instructions

## Introduction

Thank you for choosing the ZERO Modular Shellholder System by Area 419. This product is designed to enhance your reloading experience by providing consistent sizing and ease of use. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

## General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Always wear appropriate personal protective equipment (PPE) such as safety glasses and gloves when using this product.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the product for any signs of wear or damage before use.
- Do not attempt to modify the product in any way that is not recommended by the manufacturer.
- Report any unsafe conditions or accidents to the relevant authorities immediately.

## Specific Safety Precautions for Use

- **Hazard Identification:**
  - The product involves handling of shellholders and precision inserts which may pose risks if not used properly.
  - There is a risk of injury from sharp edges or moving parts during installation and use.
- **Avoiding Hazards:**
  - Always ensure the press is in a stable and secure position before use.
  - Avoid wearing loose clothing or jewelry that could become caught in the machinery.
  - Do not exceed the recommended specifications for the shellholder system.
  - Use only the precision ground headspace inserts provided with the kit to ensure safety and effectiveness.

## Instructions for Installation and Usage

1. **Installation:**
  - Choose either the Zero specific mounting system or the traditional shellholder based on your press type.
  - Securely attach the shellholder to the press, ensuring it is locked in place.
  - Insert the appropriate precision ground headspace insert into the shellholder.
2. **Usage:**
  - Set your die according to the specifications for the cartridge you are reloading.
  - Adjust the shoulder bump by selecting the desired insert size (+.002" to .008").
  - Perform a test run with a dummy round to ensure proper sizing and function.
  - If adjustments are necessary, repeat the process until the desired shoulder bump is achieved.

## Disposal Instructions

- Dispose of any packaging materials in accordance with local regulations.
- If the product becomes damaged or is no longer usable, dispose of it responsibly and in accordance with local waste management laws.

## **Contact Information for Further Support**

For any questions or concerns regarding the ZERO Modular Shellholder System, please refer to the manufacturer's official website or customer service for assistance.

By following these safety instructions, you can ensure a safe and effective experience with the ZERO Modular Shellholder System. Thank you for your attention to safety and for choosing Area 419.
