## Safety Instruction Guide

### Introduction

Thank you for choosing the Lee Taper Crimp Die for your reloading needs. This product is designed to provide reliable crimping for jacketed bullets, ensuring consistent performance. It is essential to follow all safety guidelines and instructions to ensure safe and effective use. This guide complies with the EU General Product Safety Regulation (GPSR) to help you understand how to use the product safely.

### General Safety Guidelines

- Always read and understand the instructions before using the product.
- Keep this guide in a safe place for future reference.
- Ensure that all users of this product are aware of the safety guidelines.
- Inspect the product for any damage before use. Do not use if damaged.
- Use the product only for its intended purpose as described in this guide.
- Store the product in a secure location, out of reach of children and vulnerable individuals.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform regularly.

### Specific Safety Precautions for Use

- Use only the recommended cartridges: 10 mm Auto and 40 S&W.
- Ensure that the die is properly installed and secured in the reloading press before use.
- Always wear safety glasses when reloading ammunition to protect your eyes from potential hazards.
- Avoid wearing loose clothing or jewelry that could become caught in the reloading press.
- Do not exceed the recommended load specifications for the cartridges you are reloading.
- Keep your work area clean and organized to prevent accidents.
- Avoid distractions while reloading and focus on the task at hand.

### Instructions for Installation and Usage

#### 1. Installation of the Die:

- Ensure your reloading press is turned off and unplugged.
- Locate the die holder on your press and remove any existing die.
- Insert the Lee Taper Crimp Die into the die holder and tighten securely.
- Adjust the die according to the manufacturer's instructions for proper crimping depth.

#### 2. Reloading Process:

- Prepare your brass cases by cleaning and inspecting them for any defects.
- Charge the cases with the appropriate powder load as specified in your reloading manual.
- Seat the bullets firmly into the cases, ensuring they are at the correct depth.
- Use the Lee Taper Crimp Die to apply a taper crimp to the bullets:
  - Slowly lower the ram of the press to engage the die with the case.
  - Adjust the die as needed to achieve the desired crimp.
  - Raise the ram to complete the crimping process.

#### 3. Post Reloading:

- Inspect each reloaded cartridge for proper crimp and overall quality.

- Store reloaded ammunition in a cool, dry place, and label them clearly with the load information.

## **Disposal Instructions**

- Dispose of any unused or damaged components in accordance with local regulations.
- Do not dispose of reloading materials in regular household waste.
- Contact local waste management authorities for guidance on proper disposal methods for hazardous materials.

## **Contact Information for Further Support**

For any safety inquiries or additional support, please refer to the manufacturer's website or contact their customer service directly. Ensure you have the product details ready for reference.

By following these safety instructions, you can help ensure a safe and effective reloading experience with the Lee Taper Crimp Die. Enjoy your reloading activities responsibly!
