A Backpacker Stock for Your Ruger PC Carbine

When the Backpacker Stock first emerged for the popular Ruger 10/22®, enthusiasts flocked to the streamlined design that made takedown models of the 10/22 easy to carry. Now, that same functionality is available to owners of the Ruger PC Carbine®, which operates with the same quick-takedown mechanism as the 10/22. This Magpul Backpacker Stock provides ultimate portability and provides many of the same features found in the original X-22 Backpacker. You'll find the same interface that locks the two separate halves of the gun together for transport and storage, and there are M-LOK attachment slots on the forend that make adding accessories a breeze. Ruger® models equipped with chassis and/or tubular handguards utilize a Modular Handguard Mount which will need to be replaced by the end user with a standard Takedown Block in order to mount the Magpul Forend. Each Magpul PC Carbine® Backpacker Stock includes two storage locations, one found in the water-resistant grip and the other in the cheek riser that accommodates storage for a single pistol magazine. The size of this rear compartment will accommodate magazines up to the size of Magpul's PMA 21 GL9. This drop-in stock fit is designed to work with PC Carbines chambered in 9mm and .40 S&W, and there are interchangeable cheek risers that will work for mounted optics. A non-slip rubber butt pad ensures shooting comfort, and you can add an additional 3/8-inch insert to adjust the length-of-pull.
