Oversize Expander Ball Soft seating of bullets is a technique used by many top competitors to overcome variables such as inconsistent seating depth and seating depth changes due to throat erosion. Soft seating of bolt action rifle ammunition is accomplished by leaving the bullet seated out far enough so it is pushed back into the case as the rifle bolt is closed. Thus, each bullet is started true to the rifling. Note: Maximum pressures should be approached with caution when loading with this method. Oversized Expander Balls are designed to replace the standard Expander on Forster Sizing dies. These larger Expander Balls produce reloads with lighter bullet tension, allowing you to precisely control bullet release.

Instructions for Installation and Usage

1. Installation:

- Ensure that your reloading press is turned off and unplugged to prevent accidental activation.
- Remove the existing standard expander ball from your Forster sizing die.
- Carefully install the OVERSIZE "EZ" EXPANDER BALL by screwing it into the die until secure. Ensure it is properly aligned.

2. **Usage:**

- Adjust your reloading press according to the manufacturer's instructions.
- When inserting cases, ensure that the bullet is seated out far enough to engage the expander ball.
- Close the rifle bolt slowly to allow the bullet to seat correctly into the case.
- Monitor bullet tension and release to ensure consistent performance.

3. **PostUse:**

- After reloading, inspect your ammunition for any defects.
- Clean the expander ball and sizing die regularly to maintain performance and longevity.

Disposal Instructions

- Dispose of any defective or unused expander balls in accordance with local regulations.
- Do not dispose of ammunition or components in regular household waste. Follow local guidelines for hazardous waste disposal.
