[Reloading](#) > [Bullets](#) > [Rifle Bullets](#)

Combined Technology Ballistic Silvertip bullets perform exactly like the Nosler Ballistic Tip hunting or varmint bullets but with the added benefit of an advanced Lubalox® coating. Lubalox is a micro-thin coating that helps reduce fouling for easier cleaning and minimizes pressure and friction between the bullet and the bore for improved accuracy and increased barrel life. Polymer tip won't deform under recoil while in the magazine and initiates positive expansion on impact with small and medium game. Varmint bullets feature an ultra-thin jacket mouth for instant expansion upon impact. Hunting bullets have a fully-tapered jacket with a thicker base to allow controlled expansion and create a large-diameter mushroom.
