Measures The Largest Safe Dimensions

CLYMER FIELD HEADSPACE GAUGES The Clymer Field Headspace Gauges are essential tools for gunsmiths and firearm enthusiasts, designed to measure the absolute maximum allowable safe chamber headspace in rifles. These gauges are particularly useful when assessing used firearms to ensure they meet safety standards. Key Features: Precision Measurement: Clymer gauges are machined from high-quality steel and adhere to SAAMI (Sporting Arms and Ammunition Manufacturers' Institute) specifications, ensuring accurate and reliable measurements. Safety Assurance: If a rifle's bolt closes on a Field gauge after closing on a No-Go gauge, the firearm is considered unsafe to shoot. In such cases, the barrel may need to be set back and rechambered to restore safe headspace dimensions. Caliber Compatibility: Available for popular calibers, including .308 Winchester and .30-06 Springfield, making them versatile for various rifle assessments. Specifications: Material: Machined steel Standards: Manufactured to SAAMI specifications Caliber Options: .308 Winchester (also fits .243, .260, 7mm-08, .338 Federal, and .358 Win) .30-06 Springfield (also fits .25-06, .270 Win, 8mm-06, .338-06, and .35 Whelen) Customer Insights: Our customers frequently praise the Clymer Field Headspace Gauges for their precision and reliability. Many highlight the clearly etched "Go" or "No-Go" markings and caliber names on the gauges, which make identification simple and efficient. The included durable plastic storage case is also valued for protecting and organizing the gauges, ensuring they remain in excellent condition. Adding Clymer Field Headspace Gauges to your firearm maintenance toolkit guarantees that your rifles operate within safe headspace parameters, enhancing both safety and performance.
