## Create Super-Accurate Minimum Headspace Chambers On .30 Caliber Match Rifles

The same special reamers military armorers have long used to cut minimum length chambers on match rifles, giving their shooters the accuracy advantage. The gun's own bolt applies pressure to the reamer while reamer is turned from the muzzle end. When the bolt "drops", the chamber is cut. Improved design cuts the shoulder, neck and throat to prevent neck crimping of the ammo. Use as a finish reamer ONLY. Cut chamber with conventional finish reamer first. Superb quality reamers made to SAAMI specifications.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure that you have a compatible bolt action or semiauto rifle for use with the reamer.
- Gather all necessary tools, including the #184054653 Throater/.22 THandle to drive the shaft.

### 2. Cutting the Chamber:

- Use a conventional finish reamer to cut the chamber before using the Pull Through Reamer.
- Insert the Pull Through Reamer into the chamber from the muzzle end.
- Ensure the bolt is properly engaged to apply pressure to the reamer.
- Turn the reamer slowly and steadily. When the bolt "drops," the chamber is being cut.
- Monitor the cutting process closely to ensure proper chamber dimensions.

### 3. Finishing:

- After completing the reaming process, remove the reamer carefully.
- Clean the chamber to remove any debris or shavings.

## **Disposal Instructions**

- Dispose of the reamer in accordance with local regulations.
- Ensure that the reamer is not left in a place where it could pose a risk to others, especially children.

## **Contact Information for Further Support**

For any questions or concerns regarding the use of the CLYMER .3006 Pull Through Chamber Reamer, please refer to your retailer or manufacturer for further assistance.

Thank you for your attention to these safety guidelines. Your safety is our priority.
