## A Clean, Smooth, Crisp-Breaking AK Trigger - And It's Drop-In, Too

Most of the time, rifle owners who choose to upgrade their mil-spec trigger are doing so to get greater accuracy out of their rifle. That's why most trigger upgrades have been aimed at AR-15 owners, since the AR-15 is capable of greater precision than, say, the AK-47. However, even though the AK certainly isn't a target rifle, CMC Triggers is now bringing AK owners into the trigger-upgrade world with its AK Elite Trigger Module. Like AR-15 triggers produced by CMC Triggers, the AK Elite Trigger Module is constructed with a trigger body made from 8620 carbons steel, while all the contact points inside the trigger are made from S-7 tool steel. All of the components are housed inside of an aluminum-alloy trigger unit. The trigger can be had with either an AK-style trigger shoe, an AR-15-style curved shoe or a straight target shoe, and factory-set pull weights of 3.5 or 4.5 pounds are available. Each CMC AK Elite Trigger Module is a single-stage design that provides a crisp break and a distinct reset point, as well as a shortened lock time. The entire unit drops in without any modification necessary.
