Two Precision Styles For Perfect Custom Slots

FRIEDR. DICK GMBH SCREW SLOT FILES The FRIEDR. DICK GMBH Screw Slot Files are precision-engineered tools designed specifically for gunsmiths and metalworkers who require the creation or restoration of perfectly square screw slots. These high-quality steel files are essential for achieving professional-grade results in firearm customization and repair. Description and Features: These screw slot files are available in six sizes and two distinct styles to accommodate a variety of slot dimensions, including the super-thin European slots. The two styles are: Joint Files: These files cut only on the edges and are designed to deepen the slot without widening it, ensuring precision in slot depth. Equalling Files: These are used to clean up the slot sides and square the bottom, providing a uniform and professional finish. Each file measures 5-5/8 inches (14.3 cm) in length, making them manageable for detailed work. The availability of matched, same-size pairs (one Joint and one Equalling file) allows for comprehensive slotting tasks. Additionally, a Master Screw Slot Set is offered, containing all twelve files to cover any slotting job. Specifications: Length: 5-5/8 inches (14.3 cm) Styles: Joint and Equalling Sizes: Six sizes available Material: High-quality steel Customer Insights: Customers of the FRIEDR. DICK GMBH Screw Slot Files appreciate their precision and the variety of sizes and styles available, which accommodate a wide range of screw slotting needs. The high-quality steel construction ensures durability, and the specialized designs of the Joint and Equalling files allow for meticulous slot creation and restoration. Incorporating the FRIEDR. DICK GMBH Screw Slot Files into your gunsmithing toolkit ensures you have the precise tools necessary for creating and restoring screw slots with professional accuracy. NOTE: These files are very thin and easily bent or broken. Sorry, cannot guarantee.

Safety Instruction Guide for SCREW SLOT FILES FRIEDR. DICK GMBH MASTER SLOT FILE SET STEEL

Introduction

Thank you for choosing the SCREW SLOT FILES FRIEDR. DICK GMBH MASTER SLOT FILE SET STEEL. These precision tools are designed for creating screw slots with accuracy and ease. It is important to follow safety guidelines to ensure safe use and to maximize the lifespan of your files. This guide provides essential safety instructions and information regarding the proper use and maintenance of your files.

General Safety Guidelines

- Always read the instruction manual before using the product.
- Keep the files out of reach of children and vulnerable individuals.
- Inspect files for damage before each use. Do not use damaged files.
- Use the files only for their intended purpose to avoid accidents.
- Store files in a safe, dry place to prevent bending or breakage.
- Wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, while using the files.
- Do not apply excessive force while using the files; let the tool do the work.
- Be aware of your surroundings to avoid accidents while using the files.

Specific Safety Precautions for Use

- Handle files with care as they are very thin and can easily bend or break.
- Avoid using files on materials that exceed their intended capacity.
- Ensure that the workpiece is securely clamped to prevent movement during use.
- Do not attempt to modify the files or use them for purposes other than slotting.
- Keep your hands clear of the cutting edges while using the files.
- If you experience any discomfort or pain while using the files, stop immediately and assess your technique.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools and materials before starting.
- Ensure your work area is clean and welllit.

2. Using the Joint File:

- Select the appropriate size of the Joint File for your project.
- Position the file at a 45degree angle to the slot you wish to create.
- Apply light pressure and move the file along the edges of the slot. Do not force the file.

3. Using the Equalling File:

- Choose the corresponding Equalling File of the same size.
- Use the Equalling File to clean up the sides of the slot and square the bottom.
- Again, apply light pressure and ensure even strokes for a clean finish.

4. PostUse Care:

- Clean the files after use to remove any debris or residue.
- Store the files in their designated storage case to prevent damage.

Disposal Instructions

- Dispose of any broken or damaged files in accordance with local regulations.
- Do not dispose of files in regular household waste if they are hazardous.
- Consider recycling options available in your area for metal products.
