## Two Precision Styles For Perfect Custom Slots

FRIEDR. DICK GMBH SCREW SLOT FILES The FRIEDR. DICK GMBH Screw Slot Files are precision-engineered tools designed specifically for gunsmiths and metalworkers who require the creation or restoration of perfectly square screw slots. These high-quality steel files are essential for achieving professional-grade results in firearm customization and repair. Description and Features: These screw slot files are available in six sizes and two distinct styles to accommodate a variety of slot dimensions, including the super-thin European slots. The two styles are: Joint Files: These files cut only on the edges and are designed to deepen the slot without widening it, ensuring precision in slot depth. Equalling Files: These are used to clean up the slot sides and square the bottom, providing a uniform and professional finish. Each file measures 5-5/8 inches (14.3 cm) in length, making them manageable for detailed work. The availability of matched, same-size pairs (one Joint and one Equalling file) allows for comprehensive slotting tasks. Additionally, a Master Screw Slot Set is offered, containing all twelve files to cover any slotting job. Specifications: Length: 5-5/8 inches (14.3 cm) Styles: Joint and Equalling Sizes: Six sizes available Material: High-quality steel Customer Insights: Customers of the FRIEDR. DICK GMBH Screw Slot Files appreciate their precision and the variety of sizes and styles available, which accommodate a wide range of screw slotting needs. The high-quality steel construction ensures durability, and the specialized designs of the Joint and Equalling files allow for meticulous slot creation and restoration. Incorporating the FRIEDR. DICK GMBH Screw Slot Files into your gunsmithing toolkit ensures you have the precise tools necessary for creating and restoring screw slots with professional accuracy. NOTE: These files are very thin and easily bent or broken. Sorry, cannot guarantee.
