## Extended Button & Tweaked Geometry For Extra-Secure Mag Retention

Tactical magazine catch aids in fast mag changes and secure retention to help reduce feed-related failures. Redesigned geometry ensures this catch will fit standard frame holes, while it retains a loose-fitting magazine higher in the magwell than the original catch for more reliable feeding, especially with hollow point ammo. The finely checkered, extended button is .040" higher than the original 1911A1 factory button to ensure fast positive magazine release on the first try. Precision machined on a state-of-the-art, four-axis CNC cutting station from high-grade steel barstock to ensure exact dimensions and superb strength. Available with a satin blued finish or hard-chromed for extra corrosion resistance and lubricity.
