

# 1911 STRAIGHT BORED BARREL BUSHING - EGW STRAIGHT BORED BUSHING, STAINLESS

[Handgun Parts](#) > [Barrel Parts](#) > [Barrel Bushings](#)

## Oversized For Precise Fitting; Beveled To Give A Streamlined Look

Straight-bored bushing, CNC machined from solid bar stock and designed for hand-fitting to obtain the best accuracy. Extra thick, .125" flange extends slightly farther than the original factory bushing for maximum barrel protection. Contoured, beveled edge around the flange provides a nice streamlined appearance and smooth holster entry and exit. Fits slides with .699"-.705" ID and barrel with .575"-.583" OD.

# Safety Instruction Guide for 1911 Straight Bored Barrel Bushing

## Introduction

Thank you for choosing the 1911 Straight Bored Barrel Bushing by EGW. This guide provides important safety instructions and information to ensure the proper and safe use of the product. Please read this guide carefully before installation and use.

## General Safety Guidelines

- Ensure that you are familiar with the operation of your firearm before attempting to install or use this product.
- Always handle firearms with care, following all safety protocols and guidelines.
- Use only the recommended tools for installation to prevent damage to the bushing or firearm.
- Keep the product and all firearms out of reach of children and unauthorized users.
- Regularly inspect your firearm and accessories for any signs of wear or damage.

## Specific Safety Precautions for Use

- **Installation Warning:** Gunsmith installation is required for this product. Improper installation can lead to malfunction or injury.
- **Compatibility:** Ensure that the bushing fits your firearm's specifications:
  - Fits slides with .699".705" ID
  - Fits barrels with .575".583" OD
- **Flange Thickness:** The extra thick .125" flange extends slightly farther than the original factory bushing. Ensure proper fitting to avoid excess wear on the barrel.
- **Holster Use:** The contoured, beveled edge provides a streamlined appearance for smooth holster entry and exit. Ensure that your holster is compatible with the bushing to avoid snags or damage.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather necessary tools: appropriate gunsmithing tools, cleaning supplies, and safety gear.
- Ensure that the firearm is unloaded and pointed in a safe direction.

### 2. Installation Steps:

- Remove the original barrel bushing from the firearm by following the manufacturer's guidelines.
- Clean the area where the new bushing will be installed to remove any debris or old lubricant.
- Carefully fit the new EGW Straight Bored Barrel Bushing into the slide. Ensure that it aligns properly with the barrel.
- If necessary, consult a qualified gunsmith for precise fitting. Gunsmith installation is required to ensure safety and functionality.
- Once installed, check for any movement or misalignment. The bushing should fit snugly without excessive force.

### 3. Usage:

- After installation, perform a function check of your firearm to ensure it operates correctly with the new bushing.
- Regularly clean and maintain your firearm and the bushing to ensure optimal performance.

## Disposal Instructions

- Dispose of the product and any packaging materials in accordance with local regulations.
- Do not dispose of firearms or firearm accessories in regular household waste. Contact local authorities for proper disposal methods.

## Contact Information for Further Support

For any inquiries regarding safety, installation, or product specifications, please refer to the manufacturer's contact details or your local firearms expert.

## Conclusion

By following these safety instructions, you can ensure the proper use and longevity of your 1911 Straight Bored Barrel Bushing. Always prioritize safety and consult a professional if you have any questions or concerns regarding installation or use. Thank you for your attention to these important guidelines.
