Keeps Gun Cabinets/Tool Boxes DRY!! Prevents Rust/Damage To Valuables

One of the most effective moisture absorbers ever developed. These man-made crystals prevent rust, mildew, corrosion, and tarnish before they start by literally "sucking up" and safely holding the moisture that causes them. Yet, the crystals stay dry to the touch, will not harm or dampen any surface even when saturated. When built-in indicator changes from blue to pink, the crystals have all the moisture they can hold, and are easily reactivated by heating in a conventional oven for 3 hours. The crystals can be reactivated over and over again, giving you a lifetime of protection from the destructive effect of dampness. Gives longest time between reactivations when used in enclosed areas and containers. Perfect for tool chests and lockers, closets, safes, etc., to protect guns, cameras, silver, clothing, documents, leather, medicines, electronics and tools. Several boxes may be used together for large gun cabinets and chests, closets, darkrooms, boat lockers.

Attributes

- Name: [HYDROSORBENT PRODUCTS 40 GM. SILICA GEL](#)
- Manufacturer: [HYDROSORBENT PRODUCTS](#)
- Product no.: 415100040
- Mfr. No.: SG-40
- Material: Silica
- Size: 40 g
- Style: Safe Accessory
- Delivery weight: 0.091kg
- Shipping height: 10mm
- Shipping width: 66mm
- Shipping length: 122mm
- UPC: 724225140005

Safety Instruction Guide for SILICA GEL PAKS DESICCANT HYDROSORBENT PRODUCTS

Introduction

Thank you for choosing SILICA GEL PAKS, a highly effective moisture absorber designed to protect your valuables from rust, mildew, corrosion, and tarnish. This guide provides essential safety instructions to ensure the safe and effective use of this product in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as a moisture absorber.
- Keep the product out of reach of children and pets to prevent accidental ingestion or misuse.
- Regularly check the condition of the silica gel packs and replace them when the builtin indicator changes from blue to pink.
- If the product is damaged or the packaging is compromised, discontinue use immediately.
- Report any unsafe products or accidents to the relevant authorities.

Specific Safety Precautions for Use

- Do not ingest the silica gel crystals. They are not food and can be harmful if swallowed.
- Avoid exposing the silica gel packs to water or excessive moisture as this may reduce their effectiveness.
- Do not use the silica gel packs in direct contact with food or beverages.
- Ensure that the silica gel packs are not placed in areas where they can be accidentally punctured or damaged.
- When reactivating the silica gel packs, follow the heating instructions carefully to avoid burns or fire hazards.

Instructions for Installation and Usage

1. Placement:

- Place the silica gel packs in enclosed areas and containers where moisture is a concern, such as:
 - Tool chests
 - Lockers
 - Closets
 - Safes
 - Darkrooms
 - Boat lockers
- For large areas, multiple packs can be used together for optimal moisture control.

2. Reactivation:

- When the indicator changes from blue to pink, it is time to reactivate the silica gel packs.
- To reactivate:
 - Preheat a conventional oven to 100 degrees Celsius (212 degrees Fahrenheit).
 - Place the silica gel packs on a baking sheet.
 - Heat for 3 hours.
 - Allow the packs to cool before handling.

3. Storage:

- Store unused silica gel packs in a cool, dry place away from direct sunlight.

- Ensure that the packaging remains intact until you are ready to use the product.

Disposal Instructions

- Dispose of used or expired silica gel packs in accordance with local waste disposal regulations.
- Do not incinerate the silica gel packs, as this may release harmful substances.
- If the packs are damaged or leaking, handle them with care and dispose of them responsibly.

Contact Information for Further Support

For any questions or concerns regarding the safety or use of SILICA GEL PAKS, please refer to the product packaging for contact details of the manufacturer or authorized distributor.

By following these safety instructions, you can ensure the effective use of SILICA GEL PAKS while maintaining a safe environment for yourself and others. Thank you for your attention to these important guidelines.
