## **Keeps Gun Cabinets/Tool Boxes DRY!! Prevents Rust/Damage To Valuables**

One of the most effective moisture absorbers ever developed. These man-made crystals prevent rust, mildew, corrosion, and tarnish before they start by literally "sucking up" and safely holding the moisture that causes them. Yet, the crystals stay dry to the touch, will not harm or dampen any surface even when saturated. When built-in indicator changes from blue to pink, the crystals have all the moisture they can hold, and are easily reactivated by heating in a conventional oven for 3 hours. The crystals can be reactivated over and over again, giving you a lifetime of protection from the destructive effect of dampness. Gives longest time between reactivations when used in enclosed areas and containers. Perfect for tool chests and lockers, closets, safes, etc., to protect guns, cameras, silver, clothing, documents, leather, medicines, electronics and tools. Several boxes may be used together for large gun cabinets and chests, closets, darkrooms, boat lockers.

## **Attributes**

- Name: [HYDROSORBENT PRODUCTS 750 GM. SILICA GEL](#)
- Manufacturer: [HYDROSORBENT PRODUCTS](#)
- Product no.: 415100750
- Mfr. No.: SG-750
- Material: Silica
- Size: 750 g
- Style: Safe Accessory
- Delivery weight: 1.066kg
- Shipping height: 165mm
- Shipping width: 114mm
- Shipping length: 112mm
- UPC: 724225175007

# SILICA GEL PAKS DESICCANT HYDROSORBENT PRODUCTS 750 GM

## Introduction

Thank you for choosing SILICA GEL PAKS, a highly effective moisture absorber designed to protect your belongings from rust, mildew, corrosion, and tarnish. This guide provides essential safety instructions to ensure the safe use of this product in compliance with the EU General Product Safety Regulation (GPSR).

## General Safety Guidelines

- Ensure safe handling and storage of the product.
- Keep out of reach of children and pets.
- Do not ingest the silica gel crystals.
- Use only as directed.
- Regularly check the builtin indicator for moisture levels.
- Dispose of used silica gel responsibly.

## Specific Safety Precautions for Use

- Store in a cool, dry place away from direct sunlight.
- Do not use the product in enclosed spaces without proper ventilation.
- Avoid contact with moisturesensitive items when the indicator shows pink.
- Do not attempt to reactivate the crystals if they are damaged or broken.
- Use gloves when handling the product after it has been heated for reactivation.

## Instructions for Installation and Usage

### 1. Placement:

- Place the silica gel pack in the area you wish to protect (e.g., tool chests, lockers, closets).
- For larger areas, multiple packs may be used together.

### 2. Monitoring:

- Check the builtin indicator regularly. If the color changes from blue to pink, it indicates that the crystals are saturated with moisture.

### 3. Reactivation:

- To reactivate the silica gel, preheat a conventional oven to 150°C (300°F).
- Place the silica gel pack in the oven for 3 hours.
- Allow the pack to cool completely before handling.

### 4. Disposal:

- Once the silica gel can no longer be reactivated or is damaged, dispose of it in accordance with local regulations.
- Do not throw the silica gel in the regular trash; check for special disposal instructions in your area.

## Disposal Instructions

- Dispose of used silica gel packs as per local waste management guidelines.

- Do not incinerate, as silica gel can release harmful substances when burned.
- If unsure, consult local authorities for proper disposal methods.

## **Contact Information for Further Support**

For any safety inquiries or concerns regarding the SILICA GEL PAKS, please refer to the product packaging for the EU-based contact point. Additionally, stay informed about product recalls and safety updates by visiting the EU's Safety Gate platform.

Thank you for prioritizing safety and for using SILICA GEL PAKS to protect your valuable items.
