

# MOE BIPODS - MAGPUL MOE SLING STUD BIPOD BLACK

[Shooting Accessories](#) > [Bipods, Monopods & Accessories](#) > [Bipod Accessories](#)

The MOE Bipod is the latest and lightest bipod in the Magpul Bipod line. At 8oz, it weighs almost 40% less than some of their existing bipods, while still providing a dependable, stable platform to shoot from. Designed to mount to the popular Uncle Mike's Sling Swivel Stud, Magpul utilized the latest technology in injection molding to offer a bipod with a significant reduction in weight that retains the functionality, strength, and value found in our other bipods. Attaching and detaching the MOE bipod is quick and easy with its rapid-attach sling stud mounting system. The self-locating, stainless-steel clasps ensure perfect alignment when mounting, and the large ergonomic thumbwheel allows for a strong grip and easy tightening. The non-marring, over-molded saddle was made to fit securely across a range of forend sizes, providing ideal load distribution without leaving a mark on your rifle. Adding an optional low-profile sling stud on the rear of the mount retains the ability to mount a sling to the forend of the rifle. With its low stack height of 1.73" when folded, the MOE Bipod is a streamlined package that stays out of the way until needed. The legs stow neatly forward and deploy without buttons or levers, snapping down and locking into position. The legs extend from 7 to 10 inches and slide and lock securely with the push of a button on seven 1/2-inch spaced, locking detents. Additionally, its staggered soft rubber feet hold fast on a variety of shooting surfaces. They're easily removed with a roll pin punch should users choose to change feet, and legs accept most Atlas-pattern bipod replaceable feet. Made in the USA. Incredibly strong, injection-molded polymer legs. Designed for streamlined storage until deployment. 8oz weight and extremely low stack height of 1.73" folded. Easily attached and detached with large center knob. Optional Uncle Mike's sling stud can be added to bipod rear for sling mounting. Legs adjust in 1/2-inch increments from approximately 7 to 10 inches. Easily deployed without buttons or levers and the legs lock in the down position. Removeable non-slip rubber feet that include a hole pattern compatible with common aftermarket feet.

## Attributes

- Name: [MAGPUL MOE SLING STUD BIPOD BLACK](#)
- Manufacturer: [MAGPUL](#)

# MOE BIPODS MAGPUL MOE SLING STUD BIPOD BLACK Safety Instruction Guide

## Introduction

Thank you for choosing the MOE Bipod by Magpul. This guide provides essential safety instructions and usage guidelines to ensure safe and effective use of the product. Please read this manual carefully before using the bipod to familiarize yourself with its features and safety precautions.

## General Safety Guidelines

- Ensure the bipod is used only for its intended purpose as a shooting support accessory.
- Regularly inspect the bipod for any signs of wear, damage, or malfunction before each use.
- Always use the bipod in a safe environment, away from unauthorized individuals, especially children.
- Keep the bipod clean and free from debris to maintain optimal performance.
- Follow all local laws and regulations regarding the use of firearms and shooting accessories.

## Specific Safety Precautions for Use

- **Weight Limit:** Ensure that the combined weight of the firearm and any accessories does not exceed the bipod's specifications for stability.
- **Stability:** Always ensure the bipod is securely positioned on a stable surface before shooting.
- **Leg Deployment:** Deploy the legs carefully to avoid pinching fingers or causing injury.
- **Foot Replacement:** If changing the rubber feet, ensure that the bipod is not under load to prevent injury.
- **Sling Attachment:** When attaching a sling, ensure that the sling stud is properly secured to avoid accidental detachment during use.

## Instructions for Installation and Usage

### Installation

#### 1. Mounting the Bipod:

- Locate the Uncle Mike's Sling Swivel Stud on your rifle.
- Align the bipod's mounting system with the sling swivel stud.
- Slide the bipod onto the stud until it clicks into place.
- Ensure the bipod is securely attached by gently pulling on it.

### Usage

#### 1. Adjusting the Legs:

- Press the button located on the bipod to unlock the legs.
- Extend the legs to the desired length (7 to 10 inches) and release the button to lock them into position.
- Verify that the legs are securely locked before use.

#### 2. Deploying the Bipod:

- To deploy the legs, simply push them down until they snap into place.
- Ensure the legs are fully extended and locked before taking a shooting position.

#### 3. Stowing the Bipod:

- To fold the legs, press the release button and push the legs upward until they are parallel to the bipod body.
- Store the bipod in a safe location when not in use.

## **Disposal Instructions**

- Dispose of the bipod in accordance with local regulations regarding plastic and polymer products.
- If the bipod is damaged beyond repair, ensure it is disposed of in a manner that prevents it from causing harm to the environment or wildlife.

## **Contact Information for Further Support**

For any inquiries or support regarding the MOE Bipod, please consult the manufacturer's website or contact your local retailer for assistance.

By following these safety instructions and guidelines, you can ensure a safe and enjoyable experience with your MOE Bipod. Always prioritize safety and responsible usage. Thank you for your attention and enjoy your shooting experience!
