

# **ELASTIC HOOK & LOOP CUMMERBUND - SPIRITUS SYSTEMS**

## **ELASTIC HOOK & LOOP CUMMERBUND (SIZE 2), RANGER GREEN**

[Home](#)

**Assault Panel Core** The Assault Panel Core was designed to be a multi-mission back panel attachment to your LV-119 OVERT Rear Plate Bag. We designed the Panel to fill a spectrum of needs ranging from a light weight Assault Panel, to a more robust Pack Panel. The panel is both expandable and modular and can accommodate a plethora of equipment to meet almost any operational need. The Assault Panel Core attaches to your LV-119 Rear Plate Bag using a combination of 6 directional snaps, and 2 full length zippers. It also utilizes two stabilizers that route inside of the Rear Plate Bag if the Panel is used in "Configuration 2 or 3" listed below. The Panel has a removable flap system that allows the user to configure the upper half of the Panel to meet their mission needs. (Flaps are sold separately, the Assault Panel Core does NOT come with a flap.) This eliminates the need to have multiple panels and allows for quicker donning and doffing of mission essential equipment. NOTE: This LV/119 Cummerbund is designed for use with a front and rear LV/119 plate bag. The 5-Inch Elastic Cummerbund is a simple and effective solution for professionals who need to carry and have rapid access to additional ammunition and equipment on their sides while still maintaining a low profile. Side loading is great for ground vehicle and low visibility operations. Elastic cells are 3 inches wide and are built around standard 5.56 Magazines, such as the PMAG. Elastic cummerbunds prevent user fatigue while worn for long durations, as they stretch with the body during active maneuvers. By using 5-Inch Elastic, we allow for the stable carriage of taller items as they are held more securely. The sewn-on pull tabs allow for the use of the Bungee Retention Kit to securely hold items for HALO, OTB, or other kinetic operations. The tabs also allow users to pull on the cell and make it easier to load and extract equipment. The Elastic Hook & Loop Cummerbund features premium, Berry Amendment Compliant materials sourced from industry leaders in textiles manufacturing. It offers superior construction processes, including triple stitching on the elastic cells to prolong life and prevent cell failure when stuffed with-non standard or oddly shaped items. **Cummerbund Attachment** The cummerbund attachment is a proprietary system that allows for the use of all of Spiritus Systems cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Hook & Loop is not utilized as an attachment method on the rear plate bag. Hook & Loop wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Hook & Loop doesn't handle weight well and it sticks to everything, especially cloth seats. **SIZING** The cummerbund comes in two sizes: Size 1 and Size 2, each offering up to 14 inches of total adjustment. This allows for a proper fitment for all body types. To figure our appropriate sizing, take measurement of the waist at the belly button. When measuring, users should dress as they would while actually wearing the carrier. For example, if the user is operating in arctic environments, they should be wearing cold weather equipment when measuring. Size 1: 28" to 42" Size 2: 40" to 54" **SOLD AS A SET.** If your waist measurement is 42", we suggest going up to the Size 2 cummerbund. NOTE: The LV119 Cummerbund is part of the LV119 Plate Carrier System. This item does not include a Front Plate Bag, Rear Plate Bag,

Shoulder Covers, Placards, or any other accessories. Additional components are required for proper use. Some images shown with optional accessories, sold separately.

## Attributes

- Name: [SPIRITUS SYSTEMS ELASTIC HOOK & LOOP CUMMERBUND \(SIZE 2\), RANGER GREEN](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430100561

# ELASTIC HOOK & LOOP CUMMERBUND SAFETY INSTRUCTIONS

## Introduction

Thank you for purchasing the Elastic Hook & Loop Cummerbund by Spiritus Systems. This product is designed for tactical use and provides a secure and adjustable fit for your LV119 Plate Carrier System. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

## General Safety Guidelines

- Ensure that the cummerbund is used only for its intended purpose as a tactical accessory.
- Always inspect the cummerbund for any signs of wear or damage before use. Do not use if damaged.
- Keep the cummerbund out of reach of children and vulnerable individuals when not in use.
- Be aware of your surroundings while using this product, especially in dynamic environments.
- Follow all local laws and regulations regarding the use of tactical gear.

## Specific Safety Precautions for Use

- **Proper Fitment:** Measure your waist at the belly button to determine the correct size. Size 1 fits 28" to 42", and Size 2 fits 40" to 54". If your waist measurement is at the upper end of a size range, consider opting for the larger size.
- **Clothing Considerations:** When measuring for size, wear clothing similar to what you will be wearing during use, especially in extreme weather conditions.
- **Weight Limit:** Ensure that the cummerbund is not overloaded beyond its intended capacity to avoid failure during use.
- **Avoid Hook & Loop Wear:** Hook & Loop should not be used as an attachment method on the rear plate bag. It may wear out over time and should be checked regularly for effectiveness.
- **Installation Safety:** Ensure that the cummerbund is securely attached to the plate bag before use. Verify that all snaps and zippers are properly engaged.

## Instructions for Installation and Usage

### 1. Installation:

- Attach the cummerbund inside the LV119 Rear Plate Bag using the provided directional snaps and zippers.
- Ensure that the cummerbund is correctly oriented and secured to avoid any movement during use.
- Adjust the cummerbund to fit snugly but comfortably around your waist.

### 2. Usage:

- When donning the cummerbund, ensure that it is positioned correctly and that all adjustments are made for a secure fit.
- Use the sewnon pull tabs to assist with loading and extracting equipment from the elastic cells.
- Regularly check the cummerbund during use to ensure it remains secure and functional.

## Disposal Instructions

- Dispose of the cummerbund in accordance with local waste disposal regulations.
- If the cummerbund is damaged beyond repair, consider recycling materials where possible.
- Do not dispose of the product in regular household waste if it contains nonbiodegradable materials.

## **Contact Information for Further Support**

For any inquiries regarding the safety or use of the Elastic Hook & Loop Cummerbund, please refer to the contact information provided on the packaging or the official Spiritus Systems website.

By following these safety instructions, you can ensure the effective and safe use of your Elastic Hook & Loop Cummerbund. Thank you for prioritizing safety and compliance with the EU General Product Safety Regulation.
