Squares Bolt Face To Receiver With Greater Precision, In Less Time

Carbide facing burr requires only hand tools to cut the bolt face square and concentric to the boltway. Saves man hours and setup time. Tooling block locates in the front receiver ring; turn the facing burr with a slow speed drill motor. Use after bolt lapping and squaring receiver face.

Safety Instruction Guide for BOLT FACE TRUING TOOLS MANSON PRECISION .223 FACING BURR

Introduction

Thank you for choosing the BOLT FACE TRUING TOOLS MANSON PRECISION .223 FACING BURR. This product is designed to help you achieve a square and concentric bolt face using hand tools. To ensure safe and effective use of this tool, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always use the product according to the manufacturer's instructions.
- Ensure that your workspace is clean and organized before starting work.
- Keep this tool out of the reach of children and vulnerable individuals.
- Regularly inspect the tool for any signs of damage or wear before use.
- If you encounter any issues during use, stop immediately and consult the product manual or seek assistance.

Specific Safety Precautions for Use

- Use personal protective equipment (PPE) including safety goggles and gloves to protect against debris and sharp edges.
- Ensure that the drill motor is set to a slow speed to avoid excessive force that may damage the tool or cause injury.
- Do not exceed the recommended operating speeds as specified in the product manual.
- Ensure that the tooling block is securely located in the front receiver ring before operating the facing burr.
- Avoid direct contact with the carbide cutter head during operation to prevent cuts or abrasions.
- Do not attempt to modify the tool or use it for purposes other than those specified in the manual.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the bolt is clean and free from debris.
- Gather all necessary tools, including the tooling block and the facing burr.

2. Installation:

- Insert the tooling block into the front receiver ring of the firearm.
- Make sure it fits securely and is stable.

3. Using the Facing Burr:

- Attach the facing burr to your slowspeed drill motor.
- Position the burr against the bolt face, ensuring it is aligned properly.
- Turn on the drill motor and allow the burr to cut the bolt face squarely and concentrically.
- Periodically check the progress and ensure that the tool is functioning correctly.

4. PostUse:

- After completing the task, turn off the drill motor and carefully remove the facing burr.
- Clean the tool and the working area to remove any metal shavings or debris.

Disposal Instructions

- Dispose of the product in accordance with local regulations.
- Do not dispose of the tool in regular household waste.
- If the tool is damaged or no longer usable, consider recycling the materials where possible.

Contact Information for Further Support

For any safety inquiries, product support, or further information, please refer to the manufacturer's contact details provided with the product. Always ensure that you have the most up-to-date safety information and product manuals.

Thank you for your attention to these safety instructions. Your safety is of utmost importance while using the BOLT FACE TRUING TOOLS MANSON PRECISION .223 FACING BURR.
