

RIFLE CASE LENGTH/HEADSPACE GAUGES - LYMAN 6.5 CREEDMOOR CASE LENGTH/HEADSPACE GAUGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

To achieve the highest degree of safety and accuracy, Lyman recommends that all bottleneck rifle cases be inspected after resizing to ensure that the proper headspace dimension is maintained. The best way to check this critical dimension is with a Lyman case length/headspace gauge. The reloader simply inserts the case into the gauge to insure that it does not exceed the maximum or fall below the minimum allowable headspace. Caution: Any case found with excessive headspace should be destroyed immediately.

Attributes

- Name: [LYMAN 6.5 CREEDMOOR CASE LENGTH/HEADSPACE GAUGE](#)
- Manufacturer: [LYMAN](#)
- Product no.: 539000069
- Mfr. No.: 7990346
- Cartridge: 6.5 Creedmoor
- Delivery weight: 0.122kg
- Shipping height: 25mm
- Shipping width: 76mm
- Shipping length: 127mm
- UPC: 011516703460

6.5 CREEDMOOR CASE LENGTH/HEADSPACE

GAUGE Safety Instruction Guide

Introduction

The Lyman 6.5 Creedmoor Case Length/Headspace Gauge is a precision tool designed to ensure the safety and accuracy of bottleneck rifle cases. Proper use of this gauge is essential for maintaining the correct headspace dimension after resizing your cases. This guide provides important safety instructions and guidelines for the safe use of this product in compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always inspect your rifle cases after resizing to ensure they meet the proper headspace dimensions.
- Use the gauge in a welllit and clean environment to avoid any distractions or misreadings.
- Keep the gauge out of reach of children and vulnerable individuals to prevent accidents.
- Regularly check for any product recalls or safety alerts related to this gauge via the EU Safety Gate platform.
- Report any unsafe products or incidents to the appropriate authorities.

Specific Safety Precautions for Use

- Inspect the gauge for any damage before use. Do not use a damaged gauge.
- Ensure that the gauge is compatible with the specific cartridge being measured (6.5 Creedmoor).
- Only use the gauge as intended; do not modify or use it for purposes other than measuring headspace.
- Handle the gauge with care to avoid dropping it or causing any physical damage.
- If excessive headspace is detected, destroy the case immediately to prevent potential safety hazards.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools and materials, including the Lyman Case Length/Headspace Gauge and the resized rifle case.
- Ensure that your work area is clean and organized.

2. Using the Gauge:

- Insert the resized rifle case into the gauge.
- Check that the case fits snugly without excessive force.
- Observe the gauge reading to determine if the headspace is within the acceptable range.
 - If the case exceeds the maximum allowable headspace, it must be destroyed.
 - If the case falls below the minimum allowable headspace, it is also deemed unsafe.

3. PostUse:

- Remove the case from the gauge carefully.
- Clean the gauge after each use to maintain accuracy and longevity.
- Store the gauge in a safe location away from moisture and extreme temperatures.

Disposal Instructions

- Dispose of any cases that have been found to have excessive headspace immediately.
- Follow local regulations for the disposal of firearm components and materials.
- Ensure that disposed cases are rendered unusable to prevent accidental use.

Contact Information for Further Support

For any inquiries regarding the safety and use of the Lyman 6.5 Creedmoor Case Length/Headspace Gauge, please refer to the manufacturer's contact information or customer support resources.

By following these safety guidelines and instructions, you can ensure the proper use of the Lyman Case Length/Headspace Gauge, thereby enhancing your reloading process while maintaining safety and compliance with EU regulations.
