

# **HANDGUN PRO MICROMETER SEATING DIES - LYMAN 40 S&W, 10MM PRO MICROMETER SEATING DIE**

[Reloading](#) > [Reloading Dies](#) > [Handgun Dies](#)

Our Micrometer Seating Die gives you exact bullet seating length and minimal run-out. The seating die has a micrometer adjustable seating head for precision bullet seating length. If you want to change your bullet seating depth a few thousandths of an inch, simply turn the micrometer head to the required setting. Its floating bullet seating punch centers the bullet on the case and eliminates excessive run-out. Our Micrometer Seating die is also made of corrosion resistant stainless steel which protects it from rust and keeps it looking like new for a lifetime of use.

## **Attributes**

# **Safety Instruction Guide for HANDGUN PRO MICROMETER SEATING DIES LYMAN 40 S&W, 10MM PRO MICROMETER SEATING DIE**

## **Introduction**

Thank you for choosing the HANDGUN PRO MICROMETER SEATING DIES by LYMAN. This guide provides important safety instructions and guidelines to ensure the safe use of your micrometer seating die. Please read this document carefully before using the product.

## **General Safety Guidelines**

- Ensure that you are familiar with the basic principles of reloading ammunition and the specific requirements for your firearm.
- Always wear appropriate safety gear, including safety glasses, when working with reloading equipment.
- Keep the work area clean and organized to prevent accidents.
- Store the micrometer seating die in a safe place, away from children and unauthorized users.
- Regularly inspect the die for any signs of damage or wear. Do not use if damaged.
- Report any unsafe products or accidents to the appropriate authorities.

## **Specific Safety Precautions for Use**

- Use the micrometer seating die only with compatible cartridges (40 S&W and 10MM).
- Ensure that the die is properly adjusted before starting the reloading process.
- Avoid excessive force when adjusting the micrometer head to prevent damage.
- Do not exceed the recommended bullet seating depth for your specific ammunition.
- Always follow the manufacturer's instructions for the reloading process.
- Be aware of the potential hazards associated with reloading, including the risk of accidental discharge.

## **Instructions for Installation and Usage**

### **1. Installation**

- Remove the micrometer seating die from its packaging.
- Inspect the die for any visible damage before use.
- Install the die in your reloading press according to the manufacturer's instructions.
- Ensure that the die is securely tightened in place.

### **2. Usage**

- Set the desired bullet seating depth using the micrometer head.
- Place a cartridge case in the die.
- Insert the bullet into the case and ensure it is centered.
- Operate the reloading press to seat the bullet to the desired depth.
- Check the seating depth with a caliper to verify accuracy.
- Repeat the process for additional cartridges, adjusting the micrometer head as needed.

## **Disposal Instructions**

- Dispose of any damaged or worn parts in accordance with local regulations.
- Do not discard the micrometer seating die in regular household waste.
- Contact local recycling centers for proper disposal methods of metal and steel components.

## **Contact Information for Further Support**

For any questions or concerns regarding the HANDGUN PRO MICROMETER SEATING DIES, please reach out to your local authorized dealer or manufacturer.

By adhering to these safety guidelines and instructions, you can ensure a safe and effective reloading experience with your HANDGUN PRO MICROMETER SEATING DIES. Thank you for your attention to safety.
