

# HANDGUN PRO MICROMETER SEATING DIES - LYMAN 380 AUTO PRO MICROMETER SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Handgun Dies](#)

Our Micrometer Seating Die gives you exact bullet seating length and minimal run-out. The seating die has a micrometer adjustable seating head for precision bullet seating length. If you want to change your bullet seating depth a few thousandths of an inch, simply turn the micrometer head to the required setting. Its floating bullet seating punch centers the bullet on the case and eliminates excessive run-out. Our Micrometer Seating die is also made of corrosion resistant stainless steel which protects it from rust and keeps it looking like new for a lifetime of use.

## Attributes

## LYMAN 380 AUTO PRO MICROMETER SEATING DIE

### Safety Instruction Guide

#### Introduction

Thank you for choosing the Lyman 380 Auto Pro Micrometer Seating Die. This product is designed to provide precision in bullet seating length while ensuring safety during use. Please read this safety instruction guide carefully to understand how to use the die safely and effectively.

#### General Safety Guidelines

- Ensure that all safety measures are followed during the use of the seating die.
- Always wear appropriate safety gear, including eye protection and gloves, when handling reloading equipment.
- Keep the die and all reloading components out of reach of children and unauthorized individuals.
- Regularly inspect the seating die for signs of wear or damage before each use.
- Follow the manufacturer's guidelines and instructions for safe handling and operation.

#### Specific Safety Precautions for Use

- **Hazard Identification:** The die is designed for use with .380 Auto cartridges. Using it with incompatible cartridges can result in malfunction or injury.
- **Avoid Excessive Force:** Do not apply excessive force when adjusting the micrometer head. Doing so may damage the die or cause it to malfunction.
- **Proper Storage:** Store the seating die in a cool, dry place when not in use to prevent corrosion and ensure longevity.
- **Keep Work Area Clean:** Maintain a clean and organized work area to reduce the risk of accidents.
- **Check for Obstructions:** Before using the die, ensure that there are no obstructions in the seating area that could impede operation.

#### Instructions for Installation and Usage

##### 1. Installation:

- Ensure that your reloading press is compatible with the Lyman seating die.
- Insert the seating die into the press according to the manufacturer's instructions.
- Secure the die firmly to prevent any movement during use.

##### 2. Adjusting the Micrometer:

- Turn the micrometer head to set the desired bullet seating depth. Make small adjustments to achieve precise measurements.
- Use a caliper to verify the bullet seating length after adjustments.

##### 3. Using the Die:

- Place a cartridge case in the die and ensure it is properly seated.
- Insert the bullet into the case mouth, ensuring it is centered.
- Pull the handle of the reloading press to seat the bullet. Monitor the process for any irregularities.

##### 4. PostUse Care:

- After use, clean the die to remove any residue or debris.
- Store the die in its protective case to prevent damage.

## **Disposal Instructions**

- Dispose of any damaged or wornout components in accordance with local regulations.
- Do not dispose of the seating die in regular household waste. Contact your local waste management service for proper disposal methods.

## **Contact Information for Further Support**

For any safety inquiries or further support regarding the Lyman 380 Auto Pro Micrometer Seating Die, please refer to the manufacturer's contact information provided with the product packaging.

By following these safety guidelines and instructions, you can ensure a safe and effective reloading experience with your Lyman seating die. Thank you for prioritizing safety in your reloading practices.
