- Always cut away from your body to minimize the risk of injury.

## Instructions for Installation and Usage

1. **Preparation:** Before using the chisel, ensure that you have a clean and organized workspace. Gather all necessary materials.
2. **Honing:** Final honing is required prior to use. Use a sharpening stone or honing guide to achieve a fine edge on the chisel blade.
3. **Grip:** Hold the chisel firmly by the handle. Ensure your grip is secure but not overly tight.
4. **Positioning:** Position the chisel at the desired angle against the wood surface.
5. **Cutting Technique:**
  - Start with light pressure and gradually increase as needed.
  - Use smooth, controlled strokes to shape the wood.
  - If you need to remove larger amounts of wood, make multiple shallow passes rather than trying to remove too much at once.
6. **Cleaning:** After use, clean the chisel blade with a dry cloth to remove any wood shavings and moisture. Avoid using abrasive materials that could damage the blade.
7. **Storage:** Store the chisel in a protective case or sheath to prevent accidents and protect the blade.

## Disposal Instructions

- Dispose of any damaged or unusable chisels in accordance with local regulations for hazardous materials.
- If the chisel is still functional but no longer needed, consider donating it to a local woodworking shop or educational institution.
