## High Capacity With Anti-Friction Coating; The Mags That Really Work

You'll gain reliable, additional round capacity with these high quality replacement magazines that really fit and function like proven factory magazines. Tempered steel body with hardened feed lips is treated with a phosphated anti-friction coating inside and out to ensure drop-free operation and no-jam feeding. Hardened, high tensile music wire spring and supported, self-lubricated nylon follower eliminates follower tilt so every round feeds flawlessly. Flush-fitting, 18-Round magazine features a tough synthetic base pad that removes easily for magazine cleaning. 20-Round model includes a removable, synthetic "Plus 2" base pad. Witness holes in the rear side on both models provide fast, remaining round count.
