LiteWave H3™ Green Sights from HIVIZ deliver a one-two punch of Tritium and LitePipe fiber optic technology to ensure you can see your pistol's sights 24 hours a day in ANY light conditions. The LitePipe fiber optic rods gather ambient light to produce bright green aiming dots that are as easy to acquire in the sunlight of high noon as in the gathering shadows before sunset. At night, the LiteWave H3™ sights' green self-illuminating Tritium inserts - filled with extra-bright "H3" Tritium gas - take over to maintain full visibility of those three dots. Day or night, a white outline around the front dot helps the shooter distinguish it from the rear dots.
