LiteWave H3™ Green + Orange Front Ring Sights from HIVIZ deliver a "triple threat" improvement on traditional night sight technology that ensures you can easily acquire your sights 24 hours a day in ANY light conditions. LitePipe fiber optic rods gather ambient light to produce a bright green, three-dot sight picture that's as easy to acquire in the sunlight of high noon as it is in the long shadows just before sunset. At night, the LiteWave H3's self-illuminating green Tritium inserts - filled with extra-bright "H3" Tritium gas - take over to maintain full visibility of those three dots. As a further enhancement, this version of LiteWave H3™ sights have a bright orange ring surrounding the front dot to help you find the front sight and get the three dots aligned fast - STP, in fact.
