

O-RING REPLACEMENT KITS - SINCLAIR INTERNATIONAL O-RING REPLACEMENT KIT, SMALL 308/PPC, 5 PACK

[Gun Cleaning & Chemicals](#) > [Cleaning Rods & Accessories](#) > [Cleaning Rod Guides](#)

The O-rings on your Sinclair bore guides, snouts for Sinclair All Purpose Rod Guides, Solvent Ports and Chamber Plugs should be replaced occasionally because solvents and use eventually wear them out. We use three sizes of O-rings only, so having some spares on hand is not expensive. The 222 and 223 family of guides and the 17 caliber guides do require the O-ring installation tool included in the O-ring kits. The two larger size O-rings can be installed fairly easily without the tool, though the kits include the tool for almost no additional charge over the 10 O-rings. All three O-ring sizes are available separately in 5-packs.

ORing Replacement Kits Safety Instructions

Introduction

Thank you for choosing the ORing Replacement Kits from Sinclair International. This guide provides essential safety instructions and usage guidelines to ensure the safe and effective use of the Orings with your Sinclair bore guides, snouts, and other compatible products. Please read this manual carefully before use.

General Safety Guidelines

- Ensure that the Orings are compatible with your specific model of Sinclair equipment.
- Store Orings in a cool, dry place away from direct sunlight to prevent degradation.
- Inspect Orings before each use for any signs of wear, cracks, or damage.
- Use the Oring installation tool included in the kit for specific sizes to avoid improper installation.
- Keep Orings and all related tools out of reach of children and pets.
- Always follow the manufacturer's instructions for your Sinclair equipment when using Orings.

Specific Safety Precautions for Use

- **Hazard Identification:**

- Improper installation of Orings may lead to leaks or equipment failure.
- Using damaged or worn Orings can result in solvent exposure or equipment malfunction.

- **Avoiding Hazards:**

- Do not use Orings that show signs of wear or damage.
- Ensure that the installation tool is used for the correct Oring sizes to minimize the risk of injury.
- Avoid using solvents that are not compatible with the Orings.

- **Age or Audience Specific Warnings:**

- This product is not a toy. Keep out of reach of children.
- Ensure that all users are trained in the safe handling and installation of Orings.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools, including the Oring installation tool and the replacement Orings.
- Ensure your work area is clean and well lit.

2. Installation Steps:

- Remove the old Oring from the bore guide or other equipment.
- Inspect the seating area for any debris or damage.
- Select the appropriate new Oring size.
- If using larger Orings, carefully stretch and position them over the seating area.
- For smaller Orings (222 and 223 family, and 17 caliber guides), use the installation tool:
 - Place the Oring in the tool.
 - Gently push the tool to seat the Oring in place.
- Ensure that the Oring is seated evenly and securely.

3. Post Installation:

- Check that the Oring is properly installed and does not have any twists or gaps.
- Test the equipment for leaks before regular use.

Disposal Instructions

- Dispose of old Orings according to local regulations.
- Do not dispose of Orings in the environment or with regular household waste.
- Consider recycling options where available.

Contact Information for Further Support

For any questions or concerns regarding the ORing Replacement Kits or safety instructions, please refer to the manufacturer's contact details provided with your product.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our top priorities.
