

STALWART WOODEN LOADING BLOCKS - SINCLAIR INTERNATIONAL

40 S&W 50 ROUND LOADING BLOCK

[Reloading](#) > [Case Preparation](#) > [Loading Blocks](#)

Reloaders who prefer a traditional hardwood block can use our wooden loading blocks which have the same machined fit as our "Poly" blocks. Each block is machined from select hardwood and has 50 holes (except for #LB-9, which has 32 holes). Finger grooves are machined into the sides for a sure grip. See chart for ordering information.

Attributes

Safety Instruction Guide for STALWART WOODEN LOADING BLOCKS

Introduction

Thank you for choosing the STALWART Wooden Loading Blocks by Sinclair International. This guide provides essential safety instructions to ensure the safe and effective use of your loading blocks. Please read this guide carefully before using the product.

General Safety Guidelines

- Ensure the loading blocks are used only for the intended purpose of holding ammunition during the reloading process.
- Keep the loading blocks out of reach of children and unauthorized users.
- Regularly inspect the loading blocks for any signs of damage or wear. Do not use damaged blocks.
- Use the loading blocks in a wellventilated area to avoid inhaling wood dust.
- Follow all local laws and regulations regarding ammunition reloading and storage.

Specific Safety Precautions for Use

- **Material Handling:** The loading blocks are made of hardwood. Handle with care to avoid splinters.
- **Stability:** Ensure that the loading blocks are placed on a stable and flat surface to prevent tipping over during use.
- **Weight Limit:** Do not overload the blocks beyond their designed capacity (50 rounds for standard blocks, 32 rounds for #LB9).
- **Finger Safety:** Be cautious while placing or removing rounds to avoid pinching fingers in the grooves.
- **Avoid Moisture:** Keep the loading blocks dry, as exposure to moisture can damage the wood and affect performance.

Instructions for Installation and Usage

1. **Placement:** Position the loading block on a stable, flat surface away from the edge of tables or workbenches.
2. **Loading Rounds:**
 - Begin by ensuring your hands are clean and dry.
 - Align the rounds with the holes in the block and gently press them down into place.
 - Ensure each round is seated properly and securely in its designated hole.
3. **Removing Rounds:**
 - Grasp the round firmly and pull straight up to remove it from the block.
 - Avoid twisting or jerking motions that could damage the block or the round.
4. **Cleaning:** Wipe the loading block with a dry cloth to remove dust or debris. Do not use solvents or water, as this can damage the wood.
5. **Storage:** Store the loading blocks in a cool, dry place when not in use. Avoid exposure to direct sunlight or heat sources.

Disposal Instructions

When disposing of the loading blocks, follow these guidelines: * If the blocks are damaged beyond use, dispose of them in accordance with local waste regulations. * Consider recycling the wood if possible. Check with local recycling facilities for accepted materials.

Contact Information for Further Support

For any safety inquiries or additional support regarding the STALWART Wooden Loading Blocks, please contact the manufacturer or your local distributor.

Conclusion

By following these safety instructions, you can ensure a safe and effective reloading experience with your STALWART Wooden Loading Blocks. Always prioritize safety and compliance with local laws when handling ammunition. Thank you for your attention to these guidelines.
