

# **SINCLAIR POLY LOADING BLOCK - 50 ROUND - SINCLAIR INTERNATIONAL POLY LOADING BLOCK, 50 ROUND, 0.406" DIAMETER**

[Reloading](#) > [Case Preparation](#) > [Loading Blocks](#)

These blocks are machined from solid white polyethylene providing the reloader with a very durable, easy to clean loading block. Each block is machined to fit the specific cases you reload and has finger grooves machined into the sides to provide a sure grip. Each hole has a slight chamfer for easy case head entry. The "Poly" blocks are dishwasher safe for easy cleaning. We use white polyethylene because spilled powder shows up easily. These 50 round blocks are 3/4" thick to provide deeper holes for your cases to sit in, great for short to medium length cartridges. The #749-001-313 block only has 32 holes due to the case head size.

## **Attributes**

- Name: [SINCLAIR INTERNATIONAL POLY LOADING BLOCK, 50 ROUND, 0.406" DIAMETER](#)
- Manufacturer: [SINCLAIR INTERNATIONAL](#)
- Product no.: 749001316

# Safety Instruction Guide for SINCLAIR POLY LOADING BLOCK 50 ROUND

## Introduction

Thank you for choosing the SINCLAIR POLY LOADING BLOCK. This loading block is designed to provide a safe and efficient way to organize your reloading process. Please read this safety instruction guide carefully to ensure safe use and compliance with EU General Product Safety Regulation (GPSR).

## General Safety Guidelines

- Ensure that the loading block is used only for its intended purpose, which is to hold reloading cases.
- Always inspect the loading block for any signs of damage or wear before use. Do not use if damaged.
- Keep the loading block out of reach of children and vulnerable individuals.
- Store the loading block in a cool, dry place away from direct sunlight to prevent material degradation.
- Be aware of your surroundings when using the loading block to avoid accidents.

## Specific Safety Precautions for Use

- Use the loading block only with compatible cartridges: 9 mm Luger and 380 Auto (ACP).
- Do not overload the block beyond its capacity of 50 rounds.
- Ensure that cases are properly seated in the holes and that they are clean and free from obstructions.
- Avoid using the loading block with cases that are excessively dirty or damaged.
- Clean the loading block regularly with mild detergent and water; it is dishwasher safe but should be placed on the top rack only.
- Do not expose the loading block to extreme temperatures or chemicals that could cause damage.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure your work area is clean and welllit.
- Gather all necessary reloading equipment and materials.

### 2. Loading the Block:

- Hold the loading block securely with one hand.
- Insert the reloading cases into the holes, ensuring that each case is fully seated.
- Use the finger grooves on the sides of the block for a secure grip.

### 3. Using the Block:

- Once loaded, ensure that the loading block is stable and not at risk of tipping over.
- Perform your reloading tasks carefully to avoid spills or accidents.

### 4. After Use:

- Remove all cases from the loading block once reloading is complete.
- Clean the loading block as described in the cleaning instructions.
- Store the loading block in a safe location.

## Disposal Instructions

- Dispose of the loading block in accordance with local regulations regarding plastic materials.
- If the loading block is damaged beyond repair, consider recycling it if facilities are available in your area.

## Contact Information for Further Support

For any inquiries related to safety, usage, or product concerns, please refer to the contact information provided with your product packaging or visit the manufacturer's website for assistance.

## Conclusion

By following these safety instructions, you can ensure a safe and effective reloading experience with the SINCLAIR POLY LOADING BLOCK. Always stay informed about product recalls and safety notices through the EU's Safety Gate platform. Thank you for prioritizing safety in your reloading activities.
