

SINCLAIR CHAMBER PLUG - SINCLAIR INTERNATIONAL BR FAMILY CHAMBER PLUG

[Gun Cleaning & Chemicals](#) > [Cleaning Rods & Accessories](#) > [Cleaning Rod Guides](#)

This unique product seals the chamber and bore to prevent solvents and oils from running back into the action when the rifle is left in an upright position. For heavily fouled barrels, we use these plugs to seal the chamber and then fill the barrel with our favorite solvent. Then we let the barrel sit for a while. If left overnight, you should seal the muzzle end with tape to prevent evaporation. Make sure you fill the barrel all the way to the muzzle end. If storing guns for a long time, these plugs can keep rust preventative agents and oils from seeping down into the action and trigger group area. Oil and debris washed in with excess solvent harms more triggers than just about anything. Replacement O-rings come in packs of 5.

Safety Instruction Guide for Sinclair Chamber Plug

Introduction

Thank you for choosing the Sinclair Chamber Plug. This product is designed to seal the chamber and bore of your rifle, preventing solvents and oils from entering the action when the rifle is stored upright. Proper use and maintenance of this product will enhance your shooting experience and ensure the longevity of your firearm.

General Safety Guidelines

- Always ensure the firearm is unloaded before using the chamber plug.
- Use the chamber plug only with compatible cartridges: 6 mm Rem BR, 22 BR Remington, 30 BR Remington, and 6.5 mm BR.
- Keep the chamber plug out of reach of children and vulnerable individuals.
- Regularly inspect the chamber plug for wear and tear. Replace any damaged components immediately.
- Dispose of any used solvents and oils according to local regulations.

Specific Safety Precautions for Use

- Ensure the rifle is in a stable upright position when using the chamber plug.
- When using solvents, follow the manufacturer's instructions on the solvent container.
- Avoid prolonged exposure of the chamber plug to harsh chemicals or extreme temperatures.
- If the chamber plug becomes difficult to remove, do not force it. Instead, seek assistance.
- Always seal the muzzle end with tape if the barrel is filled overnight to prevent evaporation.

Instructions for Installation and Usage

1. Preparation

- Ensure the firearm is unloaded and in a safe working environment.
- Gather necessary materials, including the chamber plug and any solvents you plan to use.

2. Installation

- Insert the Sinclair Chamber Plug into the chamber of the rifle, ensuring it fits snugly.
- Ensure that the plug is fully seated to create an effective seal.

3. Using Solvents

- If using solvents, pour the solvent into the barrel until it reaches the muzzle end.
- Allow the barrel to sit for the recommended time as per the solvent instructions.
- Seal the muzzle end with tape if the barrel is left overnight.

4. Removal

- After the recommended time, carefully remove the chamber plug from the chamber.
- Dispose of any solvents according to local regulations.

5. Maintenance

- Regularly check the Orings for wear. Replacement Orings are available in packs of 5.
- Clean the chamber plug as needed to maintain its effectiveness.

Disposal Instructions

- Dispose of the chamber plug and any used solvents in accordance with local environmental regulations.
- Do not dispose of solvents in regular trash. Check for local hazardous waste disposal facilities.

Contact Information for Further Support

For any inquiries regarding the Sinclair Chamber Plug, please refer to the manufacturer's website or customer support resources. Always ensure you have the latest information on product recalls and safety updates.

Thank you for your attention to these safety guidelines. Enjoy your shooting experience while ensuring safety and compliance with regulations.
