

# STEEL NECK BUSHINGS - REDDING 73 STYLE STEEL BUSHING/.263

[Reloading](#) > [Reloading Dies](#) > [Neck Size Bushings](#)

Heat treated steel bushings. The sizing diameters are hand polished with a surface hardness of Rc 60-62 to reduce sizing effort. Bushings are available throughout the range of .185" thru .368" in .001" increments. The last three digits of the part (#RD73XXX) denotes bushing size. View other sizes: .185" to .250" .251" to .305" .306 to .368"

## Determining Redding Bushing Size

The proper bushing size can be easily determined by measuring the outside neck diameter of your loaded cartridges with a precision micrometer or a dial caliper. Then, simply subtract .001" from the cartridge that had the smallest average neck diameter. This diameter bushing will generally size case necks just enough to create the proper press fit for the bullet.

If you are using a Type "S" style die and not turning the outside of your case necks, we suggest using a bushing .002" smaller than your smallest average neck diameter, and using the expander ball included with your Type "S" die. This size bushing will still give you minimal sizing (maximizing the life of your brass) and the expander ball will insure that each cartridge has the same bullet grip.

Redding has found that when you have cases with neck wall thicknesses on the thin side of the SAAMI tolerance, your fired case will measure considerably larger (.006" to .010" larger) than your loaded rounds. In these circumstances, Redding's tests have shown that a bushing .001" larger (than the loaded round) may give you the desired bullet grip.

## Attributes

- Name: [REDDING 73 STYLE STEEL BUSHING/.263](#)
- Manufacturer: [REDDING](#)
- Product no.: 749001994
- Mfr. No.: 73263
- Diameter (in): .263
- Delivery weight: 0.032kg
- Shipping width: 83mm
- Shipping length: 146mm
- UPC: 611760732638

# Safety Instruction Guide for STEEL NECK BUSHINGS REDDING 73 STYLE STEEL BUSHING/.263

## Introduction

Thank you for choosing the STEEL NECK BUSHINGS REDDING 73 STYLE STEEL BUSHING/.263. This guide provides essential safety instructions to ensure the safe and effective use of this product. Please read this guide carefully to understand how to use the bushings safely and responsibly.

## General Safety Guidelines

- Ensure the bushings are used in accordance with the manufacturer's specifications.
- Always inspect the bushings for any signs of damage or wear before use.
- Keep the bushings out of reach of children and vulnerable individuals to prevent accidental injury.
- Report any unsafe conditions or incidents related to the product to the appropriate authorities.
- Stay informed about product recalls by checking the EU's Safety Gate platform regularly.

## Specific Safety Precautions for Use

- Use protective gear, such as safety glasses and gloves, when handling and using the bushings.
- Avoid exceeding the maximum sizing diameter to prevent damage to the bushings and ensure safe operation.
- Ensure that the bushings are properly lubricated during use to minimize wear and prevent overheating.
- Do not modify the bushings in any way, as this may compromise their safety and effectiveness.
- Follow all manufacturer guidelines for the specific application of the bushings.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure that the work area is clean and free from clutter.
- Gather all necessary tools and materials before starting the installation.

### 2. Installation:

- Select the appropriate bushing size based on the last three digits of the part number (#RD73XXX).
- Insert the bushing into the designated sizing die, ensuring it fits snugly.
- Secure the bushing in place according to the manufacturer's instructions.

### 3. Usage:

- Begin the sizing process by applying consistent pressure to the die.
- Monitor the bushing for any signs of excessive wear or damage during use.
- After completing the sizing process, carefully remove the bushing and inspect it for any damage.

## Disposal Instructions

- Dispose of any damaged or worn bushings in accordance with local regulations.
- Do not dispose of bushings in regular household waste. Check for local recycling programs or hazardous waste disposal options.
- Ensure that all packaging materials are recycled or disposed of responsibly.

## **Contact Information for Further Support**

For any inquiries related to safety, usage, or product support, please consult the manufacturer's contact information provided with the product packaging or visit their official website.

Thank you for following these safety guidelines. Your safety and satisfaction are our top priorities.
