

DEBURRING TOOL, INSIDE-OUTSIDE - FORSTER PRODUCTS, INC.

INSIDE/OUTSIDE DEBURRING TOOL .17 TO .45 CALIBER

[Reloading](#) > [Case Preparation](#) > [Case Mouth Chamfering](#)

Most new cases have dents, irregularities and burrs at the mouth of the case. These cases should be sized, expanded and chamfered with a deburring tool. The Forster Inside-Outside Deburring Tool is a double-ended, multi-function piece of equipment that can be used by hand, by lathe, or attached to the special DBT Base (sold separately). The Inside-Outside Deburring Tool handles all cartridge cases from .17 to .45 caliber. To prepare for accurate bullet seating, insert the pointed end to chamfer the inside of the case mouth. Fit the open end over the mouth to remove exterior burrs. Sharp corners that result from trimming a case can be removed quickly and accurately with this tool by using its precision-ground and hardened cutting edges.

DEBURRING TOOL SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the Forster InsideOutside Deburring Tool. This tool is designed to help you prepare cartridge cases for accurate bullet seating by removing dents, irregularities, and burrs. To ensure safe and effective use of this product, please read and follow these safety instructions carefully.

General Safety Guidelines

- Ensure that the deburring tool is used in a welllit and clean workspace to avoid accidents.
- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, to protect yourself from sharp edges and debris.
- Keep the tool out of reach of children and vulnerable individuals.
- Be aware of your surroundings and avoid distractions while using the tool.
- Regularly inspect the tool for any signs of damage or wear. Do not use a damaged tool.
- If you experience any difficulties while using the tool, stop and consult the instructions or seek assistance.

Specific Safety Precautions for Use

- Do not apply excessive force when using the deburring tool, as this may cause injury or damage to the tool.
- Always ensure that the cartridge case is securely held in place before using the tool.
- Use the pointed end of the tool for chamfering the inside of the case mouth only; do not attempt to use it for other purposes.
- When removing exterior burrs, ensure that your hands are clear of the cutting edges.
- Store the deburring tool in a safe place when not in use to prevent accidental injury.

Instructions for Installation and Usage

1. Preparation:

- Ensure the work area is clean and welllit.
- Gather all necessary materials, including the deburring tool and cartridge cases.

2. Using the Tool:

◦ Chamfering the Inside of the Case Mouth:

- Insert the pointed end of the deburring tool into the mouth of the cartridge case.
- Rotate the tool gently to chamfer the inside edges.

◦ Removing Exterior Burrs:

- Fit the open end of the tool over the mouth of the cartridge case.
- Rotate the tool to remove any exterior burrs.

3. PostUse:

- Carefully clean the tool after each use to remove any debris.
- Inspect the tool for any damage before storing it.

Disposal Instructions

- Dispose of the deburring tool responsibly in accordance with local regulations.
- If the tool is damaged beyond repair, consider recycling materials where possible.
- Do not dispose of the tool in regular household waste if it contains hazardous materials.

Contact Information for Further Support

For any inquiries regarding safety or product support, please contact the appropriate local authorities or refer to the manufacturer's website for further assistance.

Thank you for following these safety instructions. By adhering to these guidelines, you contribute to a safer experience while using the Forster InsideOutside Deburring Tool.
