

WILSON PISTOL MAX CASE GAGES - PISTOL MAX GAGE 9MM LUGER

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. **Pistol Max Gages:** Used to check all critical dimensions of the pistol case - mouth diameter, base diameter, rim thickness and diameter, case overall length and bullet diameter

WILSON PISTOL MAX CASE GAGES PISTOL MAX GAGE 9MM LUGER Safety Instruction Guide

Introduction

Thank you for purchasing the WILSON PISTOL MAX CASE GAGES PISTOL MAX GAGE 9MM LUGER. This guide provides essential safety instructions and best practices to ensure the safe and effective use of your case gage. Please read this manual carefully before using the product.

General Safety Guidelines

- Ensure that all users of the product are familiar with these safety guidelines.
- Always store the gage in a safe place, away from children and vulnerable individuals.
- Regularly inspect the gage for any signs of wear or damage before use.
- If you suspect the gage is damaged or malfunctioning, do not use it and contact a qualified professional for inspection.
- Follow all local laws and regulations regarding reloading and ammunition.

Specific Safety Precautions for Use

- Always wear appropriate safety glasses when using the gage to protect your eyes from debris.
- Use the gage in a welllit area to ensure visibility and accuracy.
- Keep your hands and any other body parts clear of the gage's measuring area during use.
- Do not exceed the recommended specifications for the cartridge being measured.
- Avoid using the gage with cartridges that show signs of damage or excessive wear.

Instructions for Installation and Usage

1. Setup:

- Ensure that you have a clean and stable workspace.
- Gather necessary tools including a caliper for measuring headspace.

2. Measuring Headspace:

- Place the fired case into the gage.
- Use a caliper to measure the headspace accurately.
- Ensure that the case fits snugly within the gage without excessive force.

3. Checking Dimensions:

- Check the following critical dimensions:
 - Mouth diameter
 - Base diameter
 - Rim thickness and diameter
 - Case overall length
 - Bullet diameter
- Refer to the specifications provided with your gage for acceptable measurements.

4. Resizing Dies Setup:

- Use the gage to set up your 7/8"14 press type fulllength resizing dies.
- Follow the manufacturer's instructions for your specific resizing die to prevent oversizing your

brass.

Disposal Instructions

- Dispose of any damaged or unusable gages in accordance with local regulations.
- Do not throw the gage in regular household waste if it is made of hazardous materials.
- Contact your local waste management facility for proper disposal methods.

Contact Information for Further Support

For any inquiries regarding the safety or functionality of the WILSON PISTOL MAX CASE GAGES PISTOL MAX GAGE 9MM LUGER, please refer to the manufacturer's website or customer support resources. It is important to reach out for assistance if you have any concerns about the product.

Conclusion

By following these safety instructions and guidelines, you can ensure a safe and effective experience with your WILSON PISTOL MAX CASE GAGES PISTOL MAX GAGE 9MM LUGER. Always prioritize safety and compliance with local regulations when reloading ammunition. Thank you for your attention to these important safety measures.
