GameKing® bullets are designed for hunting at long range, where their extra margin of performance can make the critical difference. GameKing® bullets feature a boat tail design to bring hunters the ballistic advantage of match bullets. The streamlined tapered base of the boat tail bullet greatly reduces drag, which results in higher retained velocity, greater striking energy, a flatter trajectory and less wind drift than comparable flat base bullets. For rifles, this 150 grain #2115 Full Metal Jacket Boat Tail bullet is designed for semi-automatic types, and it functions flawlessly in the M14/M1A, M1 Garand and similar rifles. The cannelure is located to provide an overall length suitable for both the 308/7.62 NATO and the 30-06 cartridges. This 150 grain FMJBT bullet also is a good bullet at medium and low velocity for hunting game with valuable pelts to be preserved. In handguns, this 150 grain #2115 FMJBT bullet is ideally suited to the hunter who requires a non-deforming bullet to minimize pelt damage. Velocity should be kept low, and ranges must be correspondingly short to minimize damage to the pelt.
