

GEN II UNIVERSAL FLASHHOLE DEBURRING TOOL - UNIVERSAL FLASH HOLE DEBURRING TOOL GEN 2 WITH HANDLE

[Reloading](#) > [Case Preparation](#) > [Flash Hole Deburring Tools](#)

The Latest version of our Model 1000 flash hole deburring tool features stainless steel construction and chip clearance slots which alleviate the tendency of the tool to collect chips in the end of the cutting shaft. This tool is inserted in the case mouth and uses the web of the case as a safety stop. A couple of turns will remove any burrs and leave a small chamfer on the inside edge of the flash hole. Flash hole deburring is a one-time operation. Since variations of case length do not affect the use of this tool, flash hole deburring is most easily performed on brand new brass without trimming. This tool is available as the 05-1000 standard Generation II flash hole tool which consists of the cutting shaft and the tapered guide. For handloaders who prefer a large, comfortable handle, this tool is also available as the 05-1255 which includes the Sinclair large grip handle found on many of our other tools. For handloaders who already own this or our previous Model 1000 Flash Hole Deburring Tool the large Sinclair handle is available separately as the 05-1320.

GEN II Universal Flashhole Deburring Tool Safety Instructions

Introduction

Thank you for choosing the GEN II Universal Flashhole Deburring Tool. This guide provides essential safety instructions and information to ensure the safe and effective use of this product. Please read this manual carefully before using the tool to ensure proper handling and to avoid any potential hazards.

General Safety Guidelines

- Always follow the manufacturer's instructions for safe use.
- Keep the tool out of reach of children and vulnerable individuals.
- Inspect the tool before each use to ensure it is in good condition.
- Do not use the tool for any purpose other than its intended use.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls and safety updates via the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Ensure you are using the correct caliber for your specific needs to avoid damage or injury.
- Use the tool only in a welllit area to ensure visibility during use.
- Always wear safety glasses to protect your eyes from any debris or chips that may be produced.
- Avoid applying excessive force when using the tool; a couple of turns should suffice to remove burrs.
- Do not attempt to modify or repair the tool yourself; contact the manufacturer for assistance.
- Store the tool in a safe place when not in use to prevent accidents.

Instructions for Installation and Usage

1. Preparation

- Ensure that the tool is clean and free of any debris.
- Gather all necessary materials, including the cases you intend to deburr.

2. Using the Tool

- Insert the tool into the case mouth, ensuring that the web of the case acts as a safety stop.
- Rotate the tool gently for a couple of turns to remove any burrs.
- After use, carefully remove the tool from the case.

3. PostUse Care

- Clean the tool after each use to prevent the buildup of chips.
- Store the tool in its designated place to avoid accidental damage.

Disposal Instructions

- Dispose of the tool responsibly in accordance with local regulations.
- If the tool is no longer usable, consider recycling it if facilities are available.

Contact Information for Further Support

For any inquiries regarding safety or product information, please reach out to your local authorized distributor or the manufacturer directly.

Thank you for prioritizing safety while using the GEN II Universal Flashhole Deburring Tool. Your adherence to these guidelines helps ensure a safe and effective experience.
