

WILSON CASE GAGE - L.E. WILSON 44-40 WINCHESTER CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder.
SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [L.E. WILSON 44-40 WINCHESTER CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)

WINCHESTER CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 4440 WINCHESTER CASE GAGE. This product is designed to help you measure cartridge cases accurately, ensuring safe and effective reloading. This safety instruction guide outlines essential safety information, proper usage guidelines, and disposal instructions to ensure your safety and compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure that you are familiar with the operation of the case gage before use.
- Always handle the gage with care to prevent damage or injury.
- Use the gage in a welllit and clean workspace to avoid accidents.
- Keep the gage out of reach of children and vulnerable individuals.
- Regularly inspect the gage for wear or damage. Do not use if damaged.
- Report any unsafe conditions or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Always follow the manufacturer's instructions for setting up and using the gage.
- When measuring headspace, ensure that you are using a reliable caliper.
- Avoid oversizing your brass, as it can lead to dangerous reloading conditions.
- For belted magnum cartridges, be cautious of resizing at the shoulder to prolong case life.
- If you are unsure about any aspect of using the gage, seek assistance from a knowledgeable individual.

Instructions for Installation and Usage

1. Setting Up the Gage

- Ensure the gage is clean and free from debris.
- Place the gage on a stable surface.
- If using an adjustable style gage, adjust it according to the specifications for your cartridge.

2. Measuring Cartridge Cases

- Use a caliper to measure the overall length and head length of fired cases.
- Insert the case into the gage to check for proper fit.
- If the case does not fit properly, it may require trimming or resizing.

3. Trimming and Resizing

- If the overall length is too long, trim the case according to standard reloading practices.
- Resizing should be done carefully to avoid oversizing, especially for belted magnum cartridges.

4. Storing the Gage

- Store the gage in a dry place to prevent rust or damage.
- Keep it in its original packaging or a protective case when not in use.

Disposal Instructions

- Dispose of the gage in accordance with local regulations.
- If the gage is damaged beyond use, consider recycling materials where possible.
- Do not dispose of the gage in household waste if it contains any hazardous materials.

Contact Information for Further Support

For any safety inquiries or further assistance regarding the WILSON CASE GAGE L.E. WILSON 4440 WINCHESTER CASE GAGE, please refer to the manufacturer's website or contact their support team.

Thank you for your attention to these safety instructions. Your safety and satisfaction are our priorities. Enjoy using your WILSON CASE GAGE responsibly!
